# National Interagency Coordination Center <br> Incident Management Situation Report <br> Monday, August 8, 2011 - 0530 MT <br> National Preparedness Level 2 

## National Fire Activity

Initial attack activity:
New large fires:
Large fires contained:
Uncontained large fires: **
Area Command Teams committed: 0
NIMOs committed: 0
Type 1 IMTs committed: 0
Type 2 IMTs committed:
Nationally, there are 32 large fires being managed to achieve multiple objectives.
** Uncontained large fires include only fires being managed under a full suppression strategy.
Link to Geographic Area daily reports.

## Southern Area (PL 3)

New fires: 29
New large fires: 9
Uncontained large fires:23

* Apache Mountain, Texas Forest Service. Twenty-nine miles northeast of Van Horn, TX. Brush. Extreme fire behavior.
* Cherry, Texas Forest Service. Twelve miles east of Jacksboro, TX. Brush. Extreme fire behavior.

Toothman 2, Osage Agency, BIA. Two miles northeast of Prue, OK. Hardwood litter and grass. No new information.

* Colony, Concho Field Office, BIA. One mile south of Colony, OK. Grass. Moderate fire activity. Residences threatened.

EPW, Texas Forest Service. Nine miles northeast of Bastrop, TX. Brush. Moderate fire activity. Residences threatened.

* Yancy Mountain, Oklahoma DOF, Five miles northeast of Wilburton, OK. Hardwood litter. No further information received.

Honey Creek, Arkansas Forestry Commission. Two miles south of Mason Valley, AR. Hardwood litter. Residences threatened. No further information received.

Gobbler Creek, Okmulgee Field Office, BIA. Two miles northwest of Lamar, OK. Hardwood litter. No further information received.

Dry Creek, Oklahoma DOF, Three miles northwest of Porum, OK. Grass. No new information.

Deep Rock, Shawnee Field Office, BIA. Three miles northeast of Cushing, OK. Hardwood litter. Minimal fire activity.

Blue Gate, Oklahoma DOF. Ten miles south of Clayton, OK. Grass. No new information. Last report unless new information is received.

* Lateral West, Great Dismal Swamp NWR. Nine miles southeast of Suffolk, VA. Brush. Active fire behavior.

Blue Branch, Ouachita NF. Six miles south of Fanshawe, OK. Grass. No new information.
Black Fork, Oklahoma DOF. Fifteen miles east of Clayton, OK. Grass. No new information. Last report unless new information is received.

Low Gap, Oklahoma DOF. Ten miles north of Sallisaw, OK. Grass. No further information received.
Workman Farm, Oklahoma DOF. Four miles north of Tahlequah, OK. Timber. No new information.
Moro Bay, Arkansas Forestry Commission. Four miles northeast of Moro Bay, AR. Hardwood litter. No further information received.

Hermitage 1, Arkansas Forestry Commission. Five miles southeast of Hermitage, AR. Timber. No further information received.

* Dog Creek, Oklahoma DOF. Six miles northeast of Rattan, OK. Timber. No further information received.
* Friend, Oklahoma DOF. Three miles east of Wyandotte, OK. Hardwood litter. No further information received.

Muddy Water, Okmulgee Field Office, BIA. Four miles west of Hanna, OK. Slash. No further information received.

* John Ashley Road, Arkansas Forestry Commission. Four miles south of Kirby, AR. Timber. No further information received.
* Schaal Road, Arkansas Forestry Commission. Three miles west of Mineral Springs, AR. Hardwood litter. No further information received.

Predictive Services Discussion: Isolated thunderstorms will develop in the Southwest, up through the central Great Plains and back to the northern Rockies this afternoon. Showers and thunderstorms will develop around a frontal system from Oklahoma to the mid-Atlantic coast. Scattered showers and thunderstorms will occur in the Northeast. Extreme heat will continue over the southern Plains.

Predictive Services Outlook products: http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm

## Today's discussion is from the Fireline Safety Category.

## ON A HILLSIDE WHERE ROLLING MATERIAL CAN IGNITE FUEL BELOW

When firefighters find themselves in Watchout Situation \#13, they must answer the following questions:

- Can you locate/construct a line to prevent material from rolling below? What do you call line that catches rolling material? Describe how you would construct this type of line and what factors you would have to consider (e.g., slope, fuels, etc.)
- Will you get enough warning of rolling material to prevent being hit by it? Who needs to be watching for rolling material? What kinds of warning systems could you establish?
- Can you see where any material that rolls below you goes and what it does? What can happen when material rolls out of the fire and below you out of view? What needs to be done to mitigate this danger?
- Is the area free of large amounts of flashy fuels? Review the Common Denominators of Tragedy Fires.

Is the area free of chimneys, gullies, and steep slopes? Review the Common Denominators of Tragedy Fires.

- Do you have two escape routes so you can go either way? Talk about where your most likely escape routes and safety zones will be when you are on a hillside where rolling material can ignite fuel below.
- To reduce the risks:
- Post lookouts.
- Consider locating line in a defensible position. Talk about steep fires where you have had material rolling out below you and how you dealt with it.
