

**National Interagency Coordination Center
Incident Management Situation Report
Monday, August 15, 2011 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity: Light (117 new fires)
 New large fires: 4 (*)
 Large fires contained: 5
 Uncontained large fires: ** 11
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 1
 Type 2 IMTs committed: 1

Nationally, there are 44 large fires being managed to achieve multiple objectives.

** Uncontained large fires include only fires being managed under a full suppression strategy.

Southern Area (PL 3)

New fires: 19
 New large fires: 0
 Uncontained large fires: 5
 Type 1 IMTs committed: 1

Lateral West, Great Dismal Swamp NWR. IMT 1 (Quesinberry). Nine miles southeast of Suffolk, VA. Brush and grass. Moderate fire activity.

Ranger Hill, Texas Forest Service. Five miles southwest of Strawn, TX. Brush. Minimal fire activity. Reduction in acreage due to more accurate mapping.

Timpico, Texas Forest Service. Eleven miles northeast of Turkey, TX. Brush. Minimal fire activity.

Bluff, Cherokee NF. Four miles southeast of Benton, TN. Timber. Moderate fire activity.

Wallow, George Washington & Jefferson NF. Four miles southeast of Strasburg, VA. Hardwood litter. Minimal fire behavior. Precipitation occurred over the fire area yesterday.

WFS – Washington DNR

Predictive Services Discussion: Last day of moisture for portions of the West. Scattered showers and thunderstorms from Arizona and New Mexico north into western Montana. Showers and thunderstorms along the east coast to the Gulf Coast. Another shortwave trough drops into the Northwest to continue the cooling trend. A persistent mid-level high centered over the southern Great Plains will continue to bring heat extending up into the Dakotas.

Predictive Services Outlook products: <http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

**Today's discussion is from the
First Aid/Health Category.**

Fatigue/Stress

Accumulated (Chronic) Fatigue is defined as fatigue from which normal rest does not produce recovery. Accumulated fatigue is often caused by extended periods of stress with inadequate recovery periods, which results in decreased productivity, compromised immune function, and reduced alertness. Fatigued workers perform poorly, behave carelessly, tolerate greater errors and become inattentive. Chronic fatigue often results in increased stress, which may present itself through certain behavioral and physiological indicators, such as those described below:

- Behavioral indicators
 - Decreased motivation and low morale
 - Increased irritability and depression

- Physiological indicators
 - Confused, poor problem solving
 - Poor abstract thinking
 - poor attention/decisions
 - poor concentration/memory
 - extreme emotional responses
 - social/behavioral changes

- Recommendations for chronic fatigue/stress are:
 - Take longer periods of rest/recovery
 - Ensure that workers are adequately rested before they begin work shifts
 - Provide periodic rest breaks to allow physical and mental recovery
 - Alternate between heavy and light tasks
 - Eat well-balanced meals regularly, with energy supplements during periods of high exertion
 - Maintain hydration
 - Ensure workers maintain good personal hygiene
 - Maintain high standards of physical fitness and work capacity
 - In extreme cases, personnel may need to be relieved of their duties
