# National Interagency Coordination Center <br> Incident Management Situation Report <br> Tuesday, August 23, 2011 - 0530 MT <br> National Preparedness Level 2 

## National Fire Activity

Initial attack activity:
New large fires:
Large fires contained:
Uncontained large fires: **

Moderate (294 new fires)
16 (*)
10
21

Area Command Teams committed: 0
NIMOs committed: 0
Type 1 IMTs committed: 0
Type 2 IMTs committed: 3
Nationally, there are 51 large fires being managed to achieve multiple objectives.
** Uncontained large fires include only fires being managed under a full suppression strategy.
Link to Geographic Area daily reports.

## Northern Rockies Area (PL 3)

New fires: 46

New large fires: 6
Uncontained large fires: 7
Type 2 IMTs committed: 1

* Water Hole, Northern Cheyenne Agency, BIA. IMT 2 (Benes) Six miles northwest of Lame Deer, MT. Grass. Active fire behavior.
* Maverick, Miles City Field Office, BLM. Twenty one miles southwest of Broadus, MT. Pine, juniper, brush and grass. Running and torching. Residences threatened.
* Fork, Miles City Field Office, BLM. Twenty nine miles south of Ashland, MT. Pine, juniper, brush and grass. Running and torching. Residences threatened.
* Little, Miles City Field Office, BLM. Started on county lands thirty two miles southeast of Ashland, MT. Timber. Running, torching and creeping. Structures threatened.

Hoss, Crow Agency, BIA. Five miles southwest of Fort Smith, MT. Timber. No further information received. Residences threatened.

* Beauvais Creek, Crow Agency, BIA. Twenty five miles west of Crow Agency, MT. Brush and grass. Running fire.
* Boss Ribs, Northern Cheyenne Agency, BIA. Nine miles south of Lame Deer, MT. Timber. Running fire.

## Eastern Great Basin Area (PL 3)

New fires:
New large fires:
Uncontained large fires:
Bingham Point, South Central Idaho Area, Idaho Department of Lands. Ten miles north of Minidoka, ID. Brush. No further information received.

* Long Ridge, Richfield Field Office, BLM. Six miles west of Mona, UT. Grass. No further information received.

Two and a Half Mile, Idaho Falls District - South, BLM. Five miles northeast of Pocatello, ID. Brush and grass. Isolated torching and smoldering.

* Wood Canyon, Fishlake NF. Five miles south of Leamington, UT. Pinyon pine, juniper and grass. Active fire behavior.

Red Rock, Bridger-Teton NF. Nineteen miles northeast of Jackson, WY. Timber. Torching and long-range spotting. Last report unless significant activity occurs.

Saddle Complex, Salmon-Challis NF. Previously reported incident. Twenty-two miles northwest of North Fork, ID. Timber. Short runs with torching. Last report unless significant activity occurs.

Predictive Services Discussion: Scattered thunderstorms will develop over the southern and central Rockies. Showers and thunderstorms will also develop ahead of a front in the Great Lakes region. A stalled front over the Southeast will produce showers and thunderstorms from Louisiana to South Carolina. Very warm to hot conditions will continue across Texas and much of the West.

Predictive Services Outlook products: http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm

## Today's discussion is from the

 Fireline Safety Category.
## TRANSFER OF COMMAND

Risks to fireline personnel increase significantly during transfer of command periods regardless of the size or complexity of the incident. There is a high potential for fatalities, serious injuries, or incidents with potential during transfer of command periods (some have occurred in the past). Be proactive in mitigating the risks by proper implementation of LCES-Lookout, Communications, Escape Routes, and Safety Zones.

[^2]- No, or poor, briefing of incoming personnel
- Lack of fire weather and behavior information, both forecast and observed
- Communications; face-to-face briefings may not be possible and radio frequencies may be overextended and/or changing due to the increased demands on the system.
- Initial attack resources may not have checked-in and the Incident Commander may not be aware of the number, type and location of all resources.
- Location of safety zones and escape routes may not be known and communicated to all resources.

Not all Resources know who is in command.

- Mitigation actions to take:
- Lookouts: Post and maintain your own lookouts.
- Communications: Maintain existing communications with your own and adjacent resources, as well as your original supervisor, while you are developing communications with incoming adjacent resources and your new supervisor.
- Escape routes and safety zones: Identify escape routes and assure incoming resources are aware of their locations; be aware that your original escape routes and safety zones may no longer be accessible due to changing fire behavior or your increased distance from them.
- Transition at the morning briefing

Utilize the Incident Response Pocket Guide transition checklist
