# National Interagency Coordination Center <br> Incident Management Situation Report <br> Saturday, September 3, 2011 - 0530 MT National Preparedness Level 3 

## National Fire Activity

Initial attack activity:
New large fires:
Large fires contained:
Uncontained large fires: **
Area Command Teams committed:
NIMOs committed:
3
Type 1 IMTs committed: 0
Type 2 IMTs committed: 14

Nationally, there are 76 large fires being managed to achieve multiple objectives.
** Uncontained large fires include only fires being managed under a full suppression strategy.
Link to Geographic Area daily reports.

Type 2 Incident Management Team (Aultman) assigned to Hurricane Irene recovery at Fort Devons, Massachusetts will be released today. A Type 2 Incident Management Team (Ourada) is assigned to Hurricane Irene recovery at Stewart Air Force Base in New York to manage and support a mobilization center.

## Northwest Area (PL 3 )

New fires: 7
New large fires: 0
Uncontained large fires: 11
NIMOs committed: 1
Type 2 IMTs committed: 4
High Cascades Complex (six fires), Warm Springs Agency, BIA. IMT 2 (Fillis and Goff). Warm Springs Reservation. Timber, brush and grass. Active fire behavior.

Dollar Lake, Mt. Hood NF. IMT 2 (West). Sixteen miles south of Hood River, OR. Timber. Active fire behavior. Residences threatened. Evacuations in effect.

Shadow Lake, Deschutes NF. NIMO (Gage). Fifteen miles west of Sisters, OR. Timber. Minimal fire activity.
Smyth Creek, Burns District, BLM. Fifteen miles south of Diamond, OR. Timber and grass. No new information. Last report unless new information is received.

Salmon, Washington DNR. Washington IMT 2 (Johnson). Six miles northwest of Okanogan, WA. Timber. Moderate fire activity.

Webster, Warm Springs Agency, BIA. Four miles northeast of Warm Springs, OR. Grass. No new information. Last report unless new information is received.

Lauserica, Burns District, BLM. Twenty miles northwest of Fields, OR. Brush. No new information. Last report unless new information is received.

## Southern Area (PL 3)

New fires:
New large fires:0

Uncontained large fires:
18

NIMOs committed: 1
Type 2 IMTs committed: 1

A NIMO (Kleinman) is assigned to provide support to existing and new fires in Texas.
101 Ranch, Texas Forest Service. Eight miles west of Palo Pinto, TX. Grass. Moderate fire activity. Evacuations in effect.
$63^{\text {rd }}$ Street, Oklahoma DOF. The fire is within Oklahoma City. Hardwood litter. No new information.
Lateral West, Great Dismal Swamp NWR. Transfer of command from IMT 2 (Dueitt) back to local unit will occur today. Nine miles southeast of Suffolk, VA. Timber. Smoldering.

Hornets Tank, Texas Forest Service. Eleven miles northwest of Turkey, TX. Grass. Moderate fire activity.
Legacy, Texas Forest Service. Eight miles northeast of Forsan, TX. Grass. No new information.
Jack Mountain, Texas Forest Service. Five miles south of Gatesville, TX. Grass and timber. Moderate fire activity.

3457 Road, Texas Forest Service. Eight miles northwest of Poolvile, TX. Grass. Moderate fire activity.
Crab Prairie, Texas Forest Service. Thirty-one miles northeast of College Station. Timber. Minimal fire activity.
Picket Run, Texas Forest Service. Seven miles south of Bowie, TX. Grass. Minimal fire activity.
Coster, Texas Forest Service. Twenty-six miles northwest of Childress, TX. Grass. No new information. Last report unless new information is received.

Big Draw, Texas Forest Service. Eight miles northeast of Junction, TX. Grass. Minimal fire activity.

Bundy Ross, Texas Forest Service. Seven miles southeast of Telegraph, TX. Juniper, brush and grass. Minimal fire activity.

Horseshoe Bend, Texas Forest Service. Ten miles south of McGregor, TX. Grass. Minimal fire activity.
Rick Ranch, Texas Forest Service. Twenty-four miles west of Junction, TX. Grass. Moderate fire activity. Reduction in acreage due to more accurate mapping.

Kings Creek, Arkansas Forestry Commission. Three miles southeast of Mansfield, AL. Timber litter. No new information.

Sulphur Springs 739, Alabama Forestry Commission. Three miles east of Ider, AL. Southern rough. No further information received. Last report unless significant activity occurs.

Cedar Truck Complex, Texas Forest Service. One mile west of Fort McKavett, TX. Grass. Active fire behavior.

Double T, Texas Forest Service. Nineteen miles west of Brady, TX. Grass. No new information. Last report unless new information is received.

Johnson Creek, Texas Forest Service. Two miles southwest of Price, TX. Timber. Moderate fire activity.

Predictive Services Discussion: A cold front from the Upper Mississippi Valley to Colorado will merge with a front from the Great Lakes to New Mexico by the evening with scattered showers and thunderstorms across the area. Dry and windy conditions will continue over Texas and Oklahoma. Widely scattered thunderstorms will develop over the central and southern Rockies and extend to the northeast. Scattered showers and thunderstorms will move across the Gulf region from the eastern Texas coast to Florida near a Tropical Depression. Temperatures will warm in the West while the central and northern Plains remain in fall-like conditions.

Predictive Services Outlook products: http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm

## Today's discussion is from the Motorized Operations Category.

## ATV Transport

## ATV Loading/Unloading

Loading/unloading of ATVs has resulted in serious injury and even death to employees. Only those who have been fully trained in ATV operations should conduct loading/unloading procedures. The following safety measures are recommended:

- Wear all PPE (including gloves, helmet, etc.) until ATV is either secured or unloaded Ensure header board (board placed in front of bed of truck or trailer) is in place and in good condition ATV tire ramps should be secure to trailer or tail gate and on level terrain
If possible, use a tilt trailer to haul an ATV. If this is not feasible, try to lower back end of vehicle so slant of loading ramp is reduced. Back into ditch, hillside, or anything else to try and lower back end of vehicle

When loading ATV onto vehicle or trailer, keep seated, and lean body weight forward on ATV.
When unloading ATV, keep seated and keep weight forward. This helps keep ATV from flipping over backwards.
Never load or unload an ATV with a load on the racks. Load all ATVs empty.

## Securing ATV for transport

ATVs improperly loaded can be dangerous to you and other highway users. Steering can be affected if your load is not properly distributed and if not properly secured, can become dislodged and damage equipment and cause injury or death during a quick stop or crash.

Drivers are responsible for their load—regardless who actually loads equipment. All drivers are responsible for:

Inspecting the ATV
Recognizing overloads and poorly balanced weight
Knowing the gear loaded on the ATV is securely tied down.

## Securing ATV's:

Secure ATV in its normal operating position (on all four wheels)
Set the parking brake and place transmission in gear
Turn fuel valve OFF
Use chock (that fits snugly against wheels) in front and back of ATV. Front end header boards should also block forward movement of ATV.

Tie down ATV on at least each corner--use tie downs made from one inch nylon strap or greater, with hooks at each end and that have ratcheting buckles (ordinary rope should not be used due to stretching) or tie down straps that will lock in place.

ATVs should never be hauled with a load attached to the cargo racks. Hazard exists of losing the load from the ATV while in transit.
