

**National Interagency Coordination Center
Incident Management Situation Report
Saturday, September 17, 2011 – 0530 MT
National Preparedness Level 3**

National Fire Activity

Initial attack activity:	Moderate (204 new fires)
New large fires:	5 (*)
Large fires contained:	9
Uncontained large fires: **	18
Area Command Teams committed:	0
NIMOs committed:	3
Type 1 IMTs committed:	6
Type 2 IMTs committed:	9

Nationally, there are 81 large fires being managed to achieve multiple objectives.

** Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

Two MAFFS C-130 aircraft from the 302nd Airlift Wing, Colorado Springs (US Air Force Reserve), and two MAFFS from the 145th Airlift Wing, Charlotte (North Carolina Air National Guard) and support personnel have been activated and will operate from Austin, Texas. The two MAFFS and support personnel from the 153rd Airlift Wing, Cheyenne (Wyoming Air National Guard) assigned in Boise will be released today.

Southern Area (PL 4)

New fires:	24
New large fires:	4
Uncontained large fires:	12
NIMOs committed:	1
Type 1 IMTs committed:	3

NIMO (Kleinman) is assigned to provide support to existing and new fires in Texas.

Northeast Texas Fire Complex (two fires), Texas Forest Service. IMT 1 (Morcom). Four miles southwest of Linden, TX. Minimal fire activity.

Bastrop County Complex (two fires), Texas Forest Service. Transfer of command from IMT 1 (Wilder) back to local unit will occur 9/19. Six miles northeast of Bastrop, TX. Southern rough. Smoldering.

Southeast Texas Fire Complex (five fires), Texas Forest Service. IMT 1 (Opliger). Includes previously reported George Bush Park, 839 Robbins, and 841 Arbor incidents. Four miles northeast of Conroe, TX. Hardwood litter. Creeping and smoldering.

101 Ranch, Texas Forest Service. Eight miles west of Palo Pinto, TX. Timber. No new information. Last report unless new information is received.

Ireland, Texas Forest Service. One mile east of Ireland, TX. Grass. Creeping and smoldering.

* **W87C**, Ouchita NF, Four miles northeast of Big Fork Junction, AR. Hardwood litter. No further information received.

Predictive Services Discussion: A cold front will enter the Pacific Northwest, bringing showers to Washington and Oregon, otherwise cool and dry conditions will spread across much of the West. Showers and thunderstorms will also move into the High Plains along a cold front crossing the northern Rockies. High pressure over New England will keep fall-like conditions over most of the eastern half of the country except for a few thunderstorms developing over Missouri, Kansas, Oklahoma and Arkansas.

Predictive Services Outlook products: <http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

Today's discussion is from the Aviation Category.

HELICOPTER LANDING AREA SELECTION

Consider the following points when selecting a landing area for a helicopter:

- Locate a flat area that is of sufficient size for the helicopter you are expecting to land.
 - Type I -- Clear and level touchdown pad measuring 30 feet by 30 feet; safety circle measuring 110 feet in diameter.
 - Type II -- Clear and level touchdown pad measuring 20 feet by 20 feet; safety circle measuring 90 feet in diameter.
 - Type III -- Clear and level touchdown pad measuring 15 feet by 15 feet; safety circle measuring 75 feet in diameter.
- Choose an area clear of people, vehicles, and obstructions such as trees, poles, and especially overhead wires.
- The area must be free of stumps, brush, posts, large rocks or anything over 18 inches high.
- Consider the wind direction. Helicopters land and take off into the wind.
- Choose an approach free of obstructions. Any obstruction should be relayed to the helicopter crew during initial radio contact.
- Remove or secure any loose items in and around the landing area such as trash, blankets, hats, or equipment.
- Wet down the landing area if dusty conditions are present.
