# National Interagency Coordination Center <br> Incident Management Situation Report <br> Friday, October 7, 2011 - 0530 MT <br> National Preparedness Level 2 

## National Fire Activity

Initial attack activity:
New large fires:
Large fires contained:
Uncontained large fires: **
Area Command Teams committed:
NIMOs committed:
Type 1 IMTs committed:
Type 2 IMTs committed:

Light (103 new fires)

## 3 (*)

1
150

1
1
4

Nationally, there are 74 large fires being managed to achieve multiple objectives.
** Uncontained large fires include only fires being managed under a full suppression strategy.
Link to Geographic Area daily reports.

## Eastern Area (PL 2)

New fires:
New large fires:
Uncontained large fires: 2
Type 2 IMTs committed:
Pagami Creek, Superior NF. Minnesota IMT 2 (Peterson). Thirteen miles northeast of Ely, MN. Timber and grass. Active fire behavior.

* Juneberry 3, Minnesota DNR. Minnesota IMT 2 (Aultman). Fifteen miles northwest of Greenbush, MN. Grass. No further information received.

Predictive Services Discussion: Clearing and slow warming will take place over the West. Lingering areas of rain and snow across the Rockies will trail a cold front as it moves into the Plains states. Strong winds will continue ahead of the front from north Texas to the Great Lakes. High pressure will keep fair and mild conditions in place over most of the East.

Predictive Services Outlook products: http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm

# Today's discussion is from the Motorized Operations Category. 

## DRIVING SAFETY

Driving is one of the most hazardous things we do because we literally perform the task hundreds of times in the course of our daily lives we tend to take it for granted. Based on recent accident trends, vehicle accidents are the source of more deaths and serious injuries to wildland firefighters than any other single cause.

- To be a safe driver you have to want to be one. Take a good hard look at your driving habits. Are you training yourself to do the right things the right way, like fastening your seat belt, checking your mirrors, and maintaining safe following distances?
- Inattentiveness is a major contributing factor in motor vehicle accidents within the wildland firefighting community. Since the average adult attention span is 15-20 minutes we must develop techniques that allow us to refocus our attention on our driving.

Many things can lure our attention away from our driving such as: fatigue, eating and drinking, reading directions and maps, writing, cell phone and radio use, conversation within the vehicle and music.
$\checkmark$ Drive only when you are well rested and alert and avoid driving during the hours of 10:00 PM and 6:00 AM. Take a 10 to 15 minute break after every 2 hours.
$\checkmark$ Practice situational awareness; be aware of what is happening in front, behind, and on both sides of your vehicle.
$\checkmark$ Never drive when taking medications that make you drowsy.
$\checkmark$ Delegate navigation and communication to a passenger or pull over.
$\checkmark$ By constantly moving your vision, checking mirrors and distant road conditions, you can avoid highway hypnosis and daydreaming.
$\checkmark$ Avoid eating or drinking while driving.
$\checkmark$ When talking with passengers, keep your eyes on the road and both hands on the steering wheel. Avoid serious or argumentative conversations.
$\checkmark$ Do not be in a hurry, be patient.

- Safe driving starts with a safe vehicle. Something as simple as under-inflated tires can have serious consequences. Before operating any vehicle, do a walk-around to look for potential problems, make sure the lights and blinkers work, and adjust your seat and mirrors. If it is the first time you have driven the vehicle, make yourself aware of where everything is.
