

**National Interagency Coordination Center
Incident Management Situation Report
Sunday, October 16, 2011 – 0530 MT
National Preparedness Level 1**

National Fire Activity

Initial attack activity: Light (16 new fires)
 New large fires: 0 (*)
 Large fires contained: 0
 Uncontained large fires: ** 3
 Area Command Teams committed: 0
 NIMOs committed: 1
 Type 1 IMTs committed: 1
 Type 2 IMTs committed: 3

Nationally, there are 52 large fires being managed to achieve multiple objectives.

** Uncontained large fires include only fires being managed under a full suppression strategy.

Southern Area (PL 3)

New fires: 13
 New large fires: 0
 Uncontained large fires: 2
 NIMOs committed: 1
 Type 1 IMTs committed: 1
 Type 2 IMTs committed: 1

A NIMO (Gage) and an IMT 1 (Quesinberry) are assigned to provide support to existing and new fires in Texas. A transfer of command from IMT 1 (Quesinberry) to IMT 2 (Dueitt) will occur today.

Honey Prairie, Okefenokee NWR. Five miles northeast of Fargo, GA. Southern rough. Creeping and smoldering. Numerous structures threatened.

Lloyd Creek, Arkansas Forestry Commission. Seven miles south of Hampton, AR. Timber. No new information. Last report unless new information is received.

Predictive Services Discussion: A stationary front will remain across the northwestern US, keeping scattered rain and snow showers over the northern Rockies. Fair and warm conditions will continue for the western and central sections of the nation. Scattered rain will again move over the Great Lakes and New England regions as a low develops in the Midwest. Fair and mild weather will remain over the Southeast.

Predictive Services Outlook products: <http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

Today's discussion is from the
Fireline Safety Category.

EXTENDED ATTACK

After your initial size-up of the fire and/or transfer of command from an initial attack IC, answer the following questions. Repeat this analysis whenever there is a change, or predicted change, in fire conditions.

- Do you have a current fire weather forecast for the fire location?
- Is the observed fire weather consistent with the forecast?
- Have you established a new organizational structure and communicated it to the other forces associated with the fire?
- Can you control the fire with the resources available (either on the incident or soon to be on the incident) under expected conditions?
- Have you developed a plan to attack the fire?
 - Direct or indirect
 - Anchor points
 - Escape routes
 - Head or flank attack
 - Priority areas
- Have you communicated this to all personnel assigned to the incident, including new arrivals?
- Can you see all of the fire area?
- Can you communicate with everyone on the fire and with dispatch?
- Are escape routes established?
 - If you are using the black, is it completely burned and without a reburn potential?
- Are safety and the standard fire orders being followed and/or mitigated?
- Will you contain the fire before the next operational period?
- Have you reported the status of the fire to dispatch?
- Do you have a complete list of what resources have been ordered for the fire?
