

**National Interagency Coordination Center
Incident Management Situation Report
Friday, January 6, 2012 – 0800 MT
National Preparedness Level 1**

National Fire Activity (Weekly Total)

Initial attack activity: Light (266 new fires)
 New large fires: 9 (*)
 Large fires contained: 2
 Uncontained large fires: ** 8
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 0
 Type 2 IMTs committed: 0

Nationally, there are no large fires being managed to achieve multiple objectives.

** Uncontained large fires include only fires being managed under a full suppression strategy.

Southern Area (PL 1)

New fires: 231
 New large fires: 7
 Uncontained large fires: 5

* **Pac Man**, Osage Agency, BIA. Two miles northwest of Cleveland, OK. Hardwood litter. Active fire behavior.

* **Gobbler Ridge**, Oklahoma DOF. One mile northwest of Bunch, OK. Hardwood litter. No new information. Last report unless new information is received.

* **Big Camp**, National Forests in Florida. Fifteen miles northeast of Lake City, FL. Southern rough. Smoldering.

* **SW Highgrounds**, Oklahoma DOF. Four miles north of Hulbert, OK. Hardwood litter. No new information. Last report unless new information is received.

* **Dam - 14**, Oklahoma DOF. One mile north of Bunch, OK. Hardwood litter. No new information. Last report unless new information is received.

Predictive Services Discussion: A couple of weak upper level systems will bring scattered snow to the Northwest and northern and central Rockies. Otherwise, conditions will remain cool and dry across the West through the week. A storm system developing in the Gulf region early in the week will bring rain and thunderstorms to much of the South and snow to the Northeast and Great Lakes through midweek.

Predictive Services Outlook products: <http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

Today's discussion is from the Weather / Fire Behavior Category

[Scenario](#) (Interactive Cloud Poster: loads slow)

UNFAMILIAR WITH WEATHER AND LOCAL FACTORS INFLUENCING FIRE BEHAVIOR

- Ask questions of local experts! What kinds of questions would you ask?
- Does the operational period plan give you adequate weather and information? What kinds of weather forecasts can you get? What other weather or local information do you look for in the shift plan?
- Can you get information from resources that have been on the fire? What questions will you ask of the crew that you are replacing?
- Is there any other way to obtain information? List common sources of information on weather and local factors (Examples: Web based weather Activity Planner, Point Forecast Matrix, NOAA Internet Briefing)
- To reduce risks:
 - Base all actions on current and expected fire behavior.
 - Post lookouts.
 - Establish escape routes and safety zones.
 - Take extra caution! Discuss a fire where you relied on information from the local unit (perhaps where your fire knowledge and experience was very different from how they did things—southeast or Alaska).
 - Recognize and report visual indicators (clouds, WX obs., cold front passage, inversion breaking)
