National Interagency Coordination Center Incident Management Situation Report Monday, May 7, 2012 – 0800 MT National Preparedness Level 1

National Fire Activity

Initial attack activity:	Light (38 new fires)
New large fires:	0 (*)
Large fires contained:	1
Uncontained large fires: **	2
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0

Nationally there are no large fires being managed to achieve multiple objectives. ** Uncontained large fires include only fires being managed under a full suppression strategy.

Link to Geographic Area daily reports.

Southern Area (PL 2)	
New fires:	5
New large fires:	0
Uncontained large fires:	2

County Line, National Forests in Florida. Twenty-five miles north of Lake City, FL. Southern rough. Active interior burning and torching.

Ford Property, Florida Forest Service. Nine miles southwest of Oak Hill, FL. Timber and southern rough. No new information. Last report unless new information is received.

TXS – Texas Forest Service

Predictive Services Discussion: Showers and thunderstorms will develop across much of the eastern and southern U.S. High pressure building into the Plains will bring cooler and drier conditions to the northern and central Plains. In the West, dry and warm conditions will continue. In Alaska, scattered rain and snow will spread from the southeast and south into the central interior. Cool and dry conditions will continue in the north.

Predictive Services Outlook products: <u>http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm</u>

Today's discussion is from the First Aid / Health Category

Norovirus

Norovirus causes sudden vomiting and diarrhea and feeling extremely ill. It is highly contagious and can spread rapidly through a crew or fire camp by exposure to stool and vomit of sick people. Food, drink, and objects can be contaminated even if you don't see anything on them. Sick people are contagious for 3 days after recovery, possibly longer.

Symptoms of Norovirus infection usually last about 2–3 days and include:

- o Diarrhea
- o Vomiting
- Stomach pain
- o Dehydration due to excessive vomiting and diarrhea
- Treatment
 - There is no drug for treating Norovirus and antibiotics don't help
 - o Drinking plenty of fluids with electrolytes
 - o In some cases, fluid may need to be given intravenously

If you have symptoms, take these steps to prevent spread:

- Wash your hands thoroughly with soap and water after using the toilet
 - If soap and water aren't available, use a hand sanitizer that contains at least 62% ethanol
- \circ $\,$ Do not prepare food for others while you are sick and for 3 days after you recover
- Clean and disinfect surfaces with a bleach-based cleaning solution immediately after they have been contaminated by vomit or diarrhea
- o Wash soiled laundry thoroughly
 - Wear disposable gloves if possible and wash your hands after handling
 - Immediately remove items that may be contaminated, place in a plastic bag, and machine wash with detergent on the longest cycle and machine dry
 - Handle soiled items gently to avoid spreading the virus

Precautions:

- Wash your hands with soap and water before eating, drinking, or smoking
- Don't touch your mouth or food after touching anything that might be contaminated
- Wear disposable gloves when taking care of a sick buddy
