

**National Interagency Coordination Center
Incident Management Situation Report
Friday, May 11, 2012 – 0800 MT
National Preparedness Level 1**

National Fire Activity

Initial attack activity: Light (159 new fires)
 New large fires: 2 (*)
 Large fires contained: 5
 Uncontained large fires: ** 2
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 0
 Type 2 IMTs committed: 0

Nationally there are no large fires being managed to achieve multiple objectives.

** Uncontained large fires include only fires being managed under a full suppression strategy.

CNF – Coronado NF

Predictive Services Discussion: A trough over western Canada will push a mostly dry cold front across much of northwest quarter of the U.S. The Northwest, the northern Rockies, the Great Basin and northern Plains will have generally mild and dry weather. The Southwest will remain warm and dry with breezy conditions developing in the Four Corners region. Scattered showers and thunderstorms will develop across the Front Range of the Rockies from New Mexico to southeastern Wyoming and around the western Gulf region across Texas and Louisiana. Showers will move through the Great Lakes region but the East will remain warm and dry. In Alaska, an upper low will bring more rain to the south central and southeast regions with rain and snow in the interior and west. Windy conditions will develop along the southern coastal areas.

Predictive Services Outlook products: <http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

Today's discussion is from the
Hazard Tree Category.

HAZARD TREE - RISK MANAGEMENT

Situational Awareness/ Hazard Assessment

● Environment:

- Existing winds and forecast
- Night operations
- Steep slopes
- Diseased or bug-kill areas
- Number, density, and height of hazard trees
- Anticipated burn-down time
- Potential for domino effect to surrounding trees
- Maintain situational awareness and continually reassess hazards

● Hazard Tree Indicators:

- Trees burning for any period of time
- High risk tree species (rot and shallow roots)
- Numerous downed trees
- Dead, broken, or burning tops and limbs overhead
- Accumulation of downed limbs
- Absence of needles, bark or limbs
- Leaning or hung-up

● **Note:** In addition to suppression and mop-up operations, assess, control, and monitor hazard trees along roads and when selecting break areas or campsites.

● Hazard Control:

- Eliminate the hazards with qualified sawyers, blasters/explosives, or heavy equipment
- Avoid hazards by designating "No Work Zones" (NWZ) – (flag, sign, and map)
- Modify suppression tactics or fireline location to avoid extreme/high risk rated area
- Post lookouts to help maintain secure area
- Fire proof potential hazard trees to prevent ignition
- Initiate road/traffic control and area closure
- Keep clear of bucket drops near trees/snags
- Establish trigger points for reposition to secure areas in response to high winds
