National Interagency Coordination Center Incident Management Situation Report Friday, May 18, 2012 – 0800 MT National Preparedness Level 2

National Fire Activity

Initial attack activity: Light (97 new fires)

New large fires: 3 (*)
Large fires contained: 0
Uncontained large fires: ** 11
Area Command Teams committed: 0
NIMOs committed: 0
Type 1 IMTs committed: 1
Type 2 IMTs committed: 4

Link to Geographic Area daily reports.

Southwest Area (PL 3)

New fires:	9
New large fires:	1
Uncontained large fires:	5
Type 1 IMTs committed:	1
Type 2 IMTs committed:	3

Gladiator, Prescott NF. IMT 1 (Reinarz). Started on state land one mile east of Crown King, AZ. Timber. Active fire behavior. Numerous residences threatened. Community of Crown King evacuated.

Bull Flat, Fort Apache Agency, BIA. IMT 2 (Philbin). Twenty miles northwest of Cibecue, AZ. Timber, brush and grass. Creeping and smoldering.

Sunflower, Tonto NF. IMT 2 (Templin). Thirty miles north of Mesa, AZ. Pinyon pine, juniper, brush and grass. Active fire behavior. Structures threatened.

Elwood, San Carlos Agency, BIA. Thirty-six miles northeast of San Carlos, AZ. Timber. Active fire behavior.

Predictive Services Discussion: Strong, drying southwest winds will continue over most of Arizona and portions of New Mexico today. Temperatures will be hot, resulting in low daytime relative humidity over most of the Southwest. Some light wetting rains will be possible across the eastern Great Basin into the northern Rockies. Widespread shower activity will occur over Florida.

Predictive Services Outlook products: http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm

Today's discussion is from the Fireline Safety Category.

COMMON DENOMINATORS OF FIRE BEHAVIOR ON TRAGEDY FIRES

Five common denominators that contribute to accidents/incidents have been identified through studies of tragedy fires. It is important for firefighters to readily recognize the following common denominators so that future tragedies can be prevented:

- Most incidents happen on smaller fires or on isolated portions of larger fires.
- Most fires are innocent in appearance before unexpected shifts in wind direction and/or speed results in flare-ups or extreme fire behavior. In some cases, tragedies occur in the mop-up stage.
- Flare-ups generally occur in deceptively light fuels, such as grass and light brush.
- Fires run uphill surprisingly fast in chimneys, saddles, gullies, and on steep slopes.
- Some suppression tools, such as helicopters or airtankers, can adversely affect fire behavior. The blasts of air from low-flying helicopters and airtankers have been known to cause flare-ups.
