

**National Interagency Coordination Center
Incident Management Situation Report
Sunday, June 17, 2012 – 0530 MT
National Preparedness Level 3**

National Fire Activity

Initial attack activity: Light (128 new fires)
 New large fires: 4 (*)
 Large fires contained: 4
 Uncontained large fires: ** 12
 Area Command Teams committed: 0
 NIMOs committed: 2
 Type 1 IMTs committed: 2
 Type 2 IMTs committed: 2

** Uncontained large fires include only fires being managed under a full suppression strategy.

Southwest Area (PL 4)

New fires: 21
 New large fires: 0
 Uncontained large fires: 5
 NIMOs committed: 1
 Type 1 IMTs committed: 1
 Type 2 IMTs committed: 1

Little Bear, Lincoln NF. IMT 1 (Reinarz). Five miles northwest of Ruidoso, NM. Timber and grass. Minimal fire activity. Communities, communication site and ski resort threatened. Evacuations in effect. Precipitation occurred over the fire area yesterday.

Whitewater-Baldy, Gila NF. NIMO (Houseman). Fifteen miles east of Glenwood, NM. Timber. Moderate fire activity with isolated torching.

Poco, Tonto NF. IMT 2 (Reidy). One mile northeast of Young, AZ. Timber. Active fire behavior with torching and spotting. Major power transmission lines threatened.

257, Tonto NF. Four miles south of Superior, AZ. Brush. No new information.

Grand Fire, Kaibab NF. Eight miles east of Tusayan, AZ. Hardwood litter. No new information. Last report unless new information is received.

Predictive Services Discussion: A cold front will move through the Northwest and into the northern Great Basin. Strong winds and low relative humidity will create critical fire weather conditions across much of the eastern Great Basin and the central Rockies. Windy conditions will also develop over parts of Washington and Oregon. Scattered thunderstorms will develop across the Plains and the Great Lakes region. Showers and cooler weather will move into the Northwest while the Southwest continues hot and dry. Isolated thunderstorms will develop over the higher terrain of the southern Rockies. In Alaska, a few showers will linger in the South while isolated thunderstorms develop over parts of the Interior.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

Today's discussion is from "This Day in History"

"Lessons Learned" serve as brief summaries of powerful learning opportunities. You can use these summaries as a foundation and launch point for further dialogue and discussion. Apply these lessons learned to yourself, your crew, and your unit.

Origin of the 10 and 18's – June 17th, 1957

Summary: The original ten Standard Firefighting Orders were developed in 1957 by a task force commissioned by the USDA-Forest Service Chief Richard E. McArdle. The task force reviewed the records of [16 tragedy fires that occurred from 1937 to 1956](#). The Standard Firefighting Orders were based in part on the successful "General Orders" used by the United States Armed Forces. The Standard Firefighting Orders are organized in a deliberate and sequential way to be implemented systematically and applied to all fire situations.

Shortly after the Standard Firefighting Orders were incorporated into firefighter training, the 18 Situations That Shout Watch Out were developed. These 18 situations are more specific and cautionary than the Standard Fire Orders and described situations that expand the 10 points of the Fire Orders with the intent that if firefighters follow the Standard Firefighting Orders and are alerted to the 18 Watch Out Situations, much of the risk of firefighting can be reduced. Below is the original recommendation and fire orders from the report.

Standard Firefighting Orders.

Recommendation:

Adopt for service-wide use the attached "Standard Firefighting Orders." These orders are to be committed to memory by all personnel with fire control responsibilities.

STANDARD FIREFIGHTING ORDERS

1. FIRE WEATHER. Keep informed of fire weather conditions and predictions.
2. INSTRUCTIONS. Know exactly what my instructions are and follow them at all times.
3. RIGHT THINGS FIRST. Identify the key points of my assignment and take action in order of priority.
4. ESCAPE PLAN. Have an escape plan in mind and direct subordinates in event of a blow-up.
5. SCOUTING. Thoroughly scout the fire areas for which I am responsible.
6. COMMUNICATION. Establish and maintain regular communication with adjoining forces, subordinates, and superior officers.
7. ALERTNESS. Quickly recognize changed conditions and immediately revise plans to handle.
8. LOOKOUT. Post a lookout for every possibly dangerous situation.
9. DISCIPLINE. Establish and maintain control of all men under my supervision and at all times know where they are and what they are doing.

10. SUPERVISION. Be sure men I commit to any fire job have clear instructions and adequate overhead.

Discussion Opportunities

Discussion Points

Have everyone at the briefing look at the IRPG outside back cover, the current Standard Fire Orders. Compare the current and original list.

- Is the same material covered?
- What are the biggest differences?

Though the Fire Orders are in the form of a list, they are *not* a checklist. The intended use of the Orders is not to check off 1 through 10 and be done with them, but to act as reminders of conditions that need to be continuously maintained and assessed.

- What is the connection between the Standard Fire Orders and situational awareness?

[Originally there were 13 Watchout Situations](#) with the last 5 being added on in 1987.

- If you could add one more Watch Out what would it be and why?

The original recommendation in 1957 states that the Fire Orders "are to be committed to memory".

- What do you and your crew/unit do to help each other remember and understand the 10 & 18's?
