# National Interagency Coordination Center <br> Incident Management Situation Report <br> Saturday, June 30, 2012 - 0530 MT <br> National Preparedness Level 4 

## National Fire Activity

| Initial attack activity: | Light (182 new fires) |
| :--- | :---: |
| New large fires: | $9\left(^{*}\right)$ |
| Large fires contained: | 6 |
| Uncontained large fires: ** | 50 |
| Area Command Teams committed: | 1 |
| NIMOs committed: | 2 |
| Type 1 IMTs committed: | 6 |
| Type 2 IMTs committed: | 13 |
| $* *$ Uncontained large fires include only fires being managed under a full suppression |  |
| strategy. |  |
| Link to Geographic Area daily reports. |  |

Eight MAFFS C-130 aircraft and support personnel have been activated and will operate in Colorado. The MAFFS are from the $302^{\text {nd }}$ Airlift Wing, Colorado Springs (US Air Force Reserve), the $153^{\text {rd }}$ Airlift Wing, Cheyenne (Wyoming Air National Guard), the $146^{\text {th }}$ Airlift Wing, Channel Islands (California Air National Guard), and the $145^{\text {th }}$ Airlift Wing, Charlotte (North Carolina Air National Guard).

## Rocky Mountain Area (PL 5)

New fires: 22
New large fires: 1
Uncontained large fires: 11
Area Command Teams committed: 1
NIMOs committed: 1
Type 1 IMTs committed: 4
Type 2 IMTs committed: 3
Anderson's Area Command Team has been assigned to Rocky Mountain Geographic Area.
Arapaho, Albany County. IMT 2 (Pechota). Twenty-eight miles northeast of Wheatland, WY. Timber. Extreme fire behavior. Numerous structures and oil pipeline threatened. Evacuations in effect.

Pine Ridge, Grand Junction Field Office, BLM. IMT 1 (Hahnenberg). Ten miles north of Grand Junction, CO. Timber, brush and grass. Sustained runs with spotting. Numerous structures threatened, oil and gas pipelines threatened. Evacuations in effect.

Waldo Canyon, Pike and San Isabel NF. IMT 1 (Harvey). Three miles west of Colorado Springs, CO. Timber, hardwood slash and brush. Active fire behavior. Several communities and the U.S. Air Force Academy threatened. Evacuations in effect.

Weber, San Juan District, BLM. IMT 2 (Lowe). One mile south of Mancos, CO. Timber and brush. Backing fire. Numerous structures and communication towers threatened. Evacuations in effect.

Index Creek, Shoshone NF. Four miles southeast of Cook City, MT. Timber. Torching and short-range spotting.

Flagstaff, Boulder County. IMT 1 (Opliger). One mile southwest of Boulder, CO. Timber. Backing fire. Numerous residences threatened.

High Park, Larimer County. IMT 1 (Lund). Fifteen miles west of Fort Collins, CO. Timber, brush and grass. Backing fire. Numerous structures threatened. Evacuations in effect.

Dakota, Black Hills NF. IMT 2 (Fry). Seven miles northeast of Hill City, SD. Timber. Creeping and smoldering. Structures threatened.

Treasure, Pike and San Isabel NF. Five miles northeast of Leadville, CO. Timber. Creeping and smoldering with isolated torching.

Little Sand, San Juan NF. NIMO (Bennett). Thirteen miles northwest of Pagosa Springs, CO. Timber. Backing fire with occasional torching and short-range spotting. Structures threatened.

Cato, Johnson County. Sixteen miles east of Buffalo, WY. Brush. Torching.
Otter Creek/Upper Bee, Wind River/Bighorn District, BLM. Twenty miles southeast of Tensleep, WY. Juniper, hardwood slash and brush. Minimal fire activity. Structures threatened. Reduction in acreage due to more accurate mapping.

This table does not include fires reported in the large fire section of this report. Updated weekly.

Predictive Services Discussion: A stationary front will stretch across the U.S. from southeastern Oregon through the central Plains to the mid-Atlantic coast. Scattered showers and thunderstorms will form along the front from Nebraska to New York. Isolated thunderstorms will develop in the afternoon across the central and southern Rockies. A weak front moving through the Northwest will produce showers and a few thunderstorms from northern California to northwestern Montana. Hot and dry weather will continue in the desert Southwest while hot and humid conditions persist over the southern states. In Alaska, scattered showers and thunderstorms will develop over the South and eastern Interior.

Today's discussion is from the
Zones) Category.

\section*{SAFETY ZONES (part 1)}

A safety zone is a location where the threatened firefighter can find adequate refuge from an approaching fire.
- What is the difference between a safety zone and a deployment site?
- The safety zone is the area where a firefighter can survive without using a fire shelter. The deployment site is used when fire conditions are such that escape routes and safety zones have been compromised.

How do you identify a good safety zone?
- Consider the distance from the escaped fire as well as topography, winds, fire behavior, and fuels in the area.
- The best locations are usually "in the black;" those with a minimum of, or devoid of, ground/aerial vegetation; or large bodies of water.
- Location is scouted and marked well for visibility at all times.
- Location has been reassessed in relation to line work progress, fatigue, changes in fire behavior, and arrival of additional resources.
- For radiant heat only, the distance separation between the firefighter and the flames must be at least four times the maximum flame height. This distance must be maintained on all sides, if the fire has ability to burn completely around the safety zone. Convective heat from wind and/or terrain influences will increase this distance requirement.
- Take advantage of heat barriers such as lee side of ridges, large rocks, or solid structures.

What should you avoid in selecting a safety zone?
- Avoid locations that are downwind from the fire.
- Avoid locations that are in chimneys, saddles, or narrow canyons.
- Avoid locations that require a steep uphill escape route.
