# National Interagency Coordination Center Incident Management Situation Report <br> Sunday, July 8, 2012 - 0530 MT <br> National Preparedness Level 4 

## National Fire Activity

Initial attack activity:
New large fires:
Large fires contained:
Uncontained large fires: **
Area Command Teams committed: 0
NIMOs committed: 2
Type 1 IMTs committed: 3
Type 2 IMTs committed: 10
** Uncontained large fires include only fires being managed under a full suppression strategy.
Link to Geographic Area daily reports.

Six MAFFS C-130 aircraft and support personnel have been activated to support wildland fire suppression operations. The MAFFS are from the $302^{\text {nd }}$ Airlift Wing, Colorado Springs (US Air Force Reserve), the $146^{\text {th }}$ Airlift Wing, Channel Islands (California Air National Guard), and the $153{ }^{\text {rd }}$ Airlift Wing, Cheyenne (Wyoming Air National Guard). The aircraft are operating out of Colorado Springs, CO, and Cheyenne, WY.

## Eastern Great Basin Area (PL 4)

New fires: 14
New large fires: 1
Uncontained large fires: 8
NIMOs committed: 1
Type 2 IMTs committed: 5

* Kinyon Road, Twin Falls District, BLM. Eight miles southwest of Castleford, ID. Running fire. Structures threatened.

Fontenelle, Bridger-Teton NF. NIMO (Houseman) and IMT 2 (Ourada). Eighteen miles west of Big Piney, WY. Timber. Moderate fire activity with torching. Structures, power lines, gas and oil wells threatened. Evacuations and road closures in effect.

Seeley, Manti-Lasal NF. IMT 2 (Philbin). Fifteen miles northwest of Huntington, UT. Timber. Smoldering. Numerous structures threatened. Evacuations in effect. Precipitation occurred over the fire area yesterday. Reduction in acreage due to more accurate mapping.

Shingle, Dixie NF. IMT 2 (Rapp). Six miles south of Duck Creek Village, UT. Timber. Moderate fire activity. Numerous structures threatened. Evacuations in effect.

Clay Springs, Central Area, Utah DOF. IMT 2 (Walker). Four miles south of Oak City, UT. Timber, brush and grass. Minimal fire activity. Structures, major power lines and gas pipelines threatened.

Quail, Northwest Area, Utah DOF. Transfer of command from IMT 2 (Sommer) back to the local unit will occur today. One mile east of Alpine, UT. Timber, brush and grass. Creeping and smoldering.

Wolf Den, Vernal District, BLM. Forty miles south of Vernal, UT. Pinyon pine, juniper and brush. Creeping and smoldering.

Bear Cub, Bridger-Teton NF. Twenty-two miles east of Moran, WY. Timber. Creeping and smoldering.

## Southern Area (PL 2)

New fires: 10
New large fires: 2
Uncontained large fires: 8
Type 2 IMTs committed: 1

Neighbor Mtn, Shenandoah NP. Transfer of command from IMT 2 (Wilder) back to the local unit will occur today. Three miles northeast of Luray, VA. Hardwood litter. Minimal fire activity.

Point 2, George Washington and Jefferson NF. Three miles northeast of Seneca Rocks, VA. Hardwood litter and brush. Creeping and smoldering. Structures threatened.

Deer Hammock, Everglades NP. Twenty miles west of Homestead, FL. Southern rough. Backing fire.

* Eagle City, Oklahoma DOF. Three miles south of Eagle City, OK. Timber and grass. Torching and spotting. Structures threatened.
* Burgentine, Aransas NWR. Six miles east of Austwell, TX. Grass. Active fire behavior with spotting.

Old Jackson Chapel, Georgia Forestry Commission. Four miles south of Cave Springs, GA. Hardwood litter. No new information. Last report unless new information is received.

Dillard, Texas Forest Service. Seven miles east of Wichita Falls, TX. Grass. No new information
Alligator II, Mississippi Forestry Commission. Five miles east of Poplarville, MS. Timber. No new information.
Fall City, Allegheny NF. Six miles southeast of Double Springs, AL. Hardwood litter. Moderate fire activity. Structures threatened. Last report unless significant activity occurs.

| EA | 5 | 1,040 | 0 | 9 | 0 | 65 |
| SA | 10 | 2,373 | 4 | 13 | 1 | 272 |
| Total | 33 | 178,268 | 12 | 31 | 5 | 690 |

This table does not include fires reported in the large fire section of this report. Updated weekly.

Predictive Services Discussion: Scattered thunderstorms will develop across the central and southern Rockies, gradually spreading into eastern Utah and central Arizona. Isolated thunderstorms will also develop in the northern Great Basin over southeastern Oregon and southwestern Idaho. Temperatures will continue to rise across the West under building high pressure. Scattered showers and thunderstorms will develop from the mid-Atlantic states to the High Plains. Heavy rain is possible along the Colorado Front Range. In Alaska, rain will continue across the South while scattered thunderstorms spread northward across the Interior.

# Today's discussion is from the Fireline Safety Category. 

## TRANSFER OF COMMAND

Risks to fireline personnel increase significantly during transfer of command periods regardless of the size or complexity of the incident. There is a high potential for fatalities, serious injuries, or incidents with potential during transfer of command periods (some have occurred in the past). Be proactive in mitigating the risks by proper implementation of LCES-Lookout, Communications, Escape Routes, and Safety Zones.

## - Factors for increased risks to fireline personnel during transition periods include:

- No, or poor, briefing of incoming personnel
- Lack of fire weather and behavior information, both forecast and observed
- Communications; face-to-face briefings may not be possible and radio frequencies may be overextended and/or changing due to the increased demands on the system.
- Initial attack resources may not have checked-in and the Incident Commander may not be aware of the number, type and location of all resources.
- Location of safety zones and escape routes may not be known and communicated to all resources.
- Not all Resources know who is in command.

Mitigation actions to take:

- Lookouts: Post and maintain your own lookouts.
- Communications: Maintain existing communications with your own and adjacent resources, as well as your original supervisor, while you are developing communications with incoming adjacent resources and your new supervisor.
- Escape routes and safety zones: Identify escape routes and assure incoming resources are aware of their locations; be aware that your original escape routes and safety zones may no longer be accessible due to changing fire behavior or your increased distance from them.
- Transition at the morning briefing
- Utilize the Incident Response Pocket Guide transition checklist
