# National Interagency Coordination Center <br> Incident Management Situation Report <br> Monday, July 92012 - 0530 MT <br> National Preparedness Level 4 

## National Fire Activity

| Initial attack activity: | Light (168 new fires) |
| :--- | :---: |
| New large fires: | $6\left(^{*}\right)$ |
| Large fires contained: | 4 |
| Uncontained large fires: ** | 37 |
| Area Command Teams committed: | 0 |
| NIMOs committed: | 2 |
| Type 1 IMTs committed: | 4 |
| Type 2 IMTs committed: | 8 |
| ** Uncontained large fires include only fires being managed under a full suppression |  |
| strategy. |  |
| Link to Geographic Area daily reports. |  |

Six MAFFS C-130 aircraft and support personnel have been activated to support wildland fire suppression operations. The MAFFS are from the $302^{\text {nd }}$ Airlift Wing, Colorado Springs (US Air Force Reserve), the $146^{\text {th }}$ Airlift Wing, Channel Islands (California Air National Guard), and the $153{ }^{\text {rd }}$ Airlift Wing, Cheyenne (Wyoming Air National Guard). The aircraft are operating out of Colorado Springs, CO, and Cheyenne, WY.

## Eastern Great Basin Area (PL 4)

New fires: 15
New large fires: 0
Uncontained large fires: 8
NIMOs committed: 1
Type 2 IMTs committed: 5

Kinyon Road, Twin Falls District, BLM. IMT 2 (Adell). Eight miles southwest of Castleford, ID. Brush and grass. Running fire. Structures and historical sites threatened.

Fontenelle, Bridger-Teton NF. NIMO (Houseman) and IMT 2 (Ourada). Eighteen miles west of Big Piney, WY. Timber. Moderate fire activity with torching. Road closures in effect.

Seeley, Manti-Lasal NF. IMT 2 (Philbin). Fifteen miles northwest of Huntington, UT. Timber. Creeping and smoldering. Numerous structures threatened. Evacuations in effect. Precipitation occurred over the fire area yesterday.

Shingle, Dixie NF. Transfer of command from IMT 2 (Rapp) back to the local unit will occur on $7 / 11$. Six miles south of Duck Creek Village, UT. Timber. Creeping and smoldering. Numerous structures threatened. Evacuations in effect. Precipitation occurred over the fire area yesterday. Reduction in acreage due to more accurate mapping.

Clay Springs, Central Area, Utah DOF. Transfer of command from IMT 2 (Walker) back to local unit will occur tomorrow. Four miles south of Oak City, UT. Timber, brush and grass. Smoldering. Major power lines and gas pipelines threatened.

Quail, Northwest Area, Utah DOF. One mile east of Alpine, UT. Timber, brush and grass. Creeping and smoldering.

Wolf Den, Vernal District, BLM. Forty miles south of Vernal, UT. Pinyon pine, juniper and brush. Creeping and smoldering.

Bear Cub, Bridger-Teton NF. Twenty-two miles east of Moran, WY. Timber. Creeping and smoldering.

| Total | 33 | 178,268 | 12 | 31 | 5 | 690 |

This table does not include fires reported in the large fire section of this report. Updated weekly.

Predictive Services Discussion: Temperatures will continue to be very hot across the West as high pressure builds aloft. Scattered thunderstorms will develop over the central and southern Rockies. Thunderstorms will also develop over the Great Basin, especially over the mountains of Utah and western Wyoming, and across parts of the Northwest and northern Rockies. Cooler weather will move into much of the eastern U.S. as a front drops into the Southeast. Scattered showers and thunderstorms will develop along the front from eastern Colorado to Virginia. Hot and humid conditions will continue along the Gulf Coast states with scattered afternoon thunderstorms. In Alaska, scattered showers and a few thunderstorms will develop across the South with a few storms forming farther north through the Interior.

## http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm

## Today's discussion is from the Weather / Fire Behavior Category.

## NFDRS POCKET CARDS

An aid to identifying local fuels conditions that might contribute to severe fire behavior is the NFDRS Pocket Card. The Pocket Card displays a general assessment of the fire potential compared to local fire occurrence and historical fire danger. It is a tool that can be used to track daily outputs of the National Fire Danger Rating System (NFDRS) throughout the fire season for a local area.

- The Pocket Card provides:
- A general indicator of the potential fire danger for a given rating area.
- A graph to show the trend and status of the current year's fire season.
- A comparison of current year's conditions to historical worst and average conditions.
- Fire danger values related to past large fires.
- Critical local thresholds for temperature, humidity, wind speed, and fuel moistures.

Discuss the following ways to use the Pocket Card:

- Use it primarily before fires occur, before arriving to a fire, and during initial stages of fire events, such as initial fire size-up, initial attack, and extended attack.
- Use the Pocket Card to track local fire danger and in so doing increase the safety of your firefighters through increased awareness of fire danger conditions. NOTE: If fire danger is running at or above seasonal highs, be alert to those weather conditions that can lead to extreme fire behavior; e.g., low RH, 1-hour fuel moisture less than $5 \%$, high temperatures, moderate to high winds.
- Use it to track daily fire dangers so that there are no surprises when extreme fire behavior occurs.
- Use it to supplement local experience.
- Use the Pocket Card as a point of reference for firefighters not familiar with the area represented by the card.
- When you receive your fire assignment outside your local area, visit the National Pocket Card website at http://fam.nwcg.gov/fam-web/pocketcards/default.htm/. Click on the map and locate a Pocket Card for the area to which you are going.
- Put the Card in the Pocket of all your firefighters and keep a copy in your fire vehicle.
- Post the card in dispatch. Use them in briefings. Provide them to incoming crews.
- Do not use the Pocket Card for site specific fire behavior predictions and fireline actions or without an interpretive briefing.
- Review definitions and implications of ERC and BI values.
