# National Interagency Coordination Center Incident Management Situation Report <br> Saturday, July 14, 2012 - 0530 MT <br> National Preparedness Level 4 

## National Fire Activity

Initial attack activity:
New large fires:
Large fires contained:
Uncontained large fires: **
Area Command Teams committed:
NIMOs committed:
Type 1 IMTs committed:
Type 2 IMTs committed:
Type 2 IMTs committed: 7
** Uncontained large fires include only fires being managed under a full suppression strategy.
Link to Geographic Area daily reports.

Six MAFFS C-130 aircraft and support personnel have been activated to support wildland fire suppression operations. The MAFFS are from the $302^{\text {nd }}$ Airlift Wing, Colorado Springs (US Air Force Reserve), the $146^{\text {th }}$ Airlift Wing, Channel Islands (California Air National Guard), and the $153{ }^{\text {rd }}$ Airlift Wing, Cheyenne (Wyoming Air National Guard). The aircraft are operating out of Hill Air Force Base, UT, and Boise, ID.

## Eastern Great Basin Area (PL 4)

New fires:
24
New large fires: 2
Uncontained large fires: 18
Type 2 IMTs committed: 2
Seeley, Manti-Lasal NF. Fifteen miles northwest of Huntington, UT. Timber. Moderate fire activity.
Flood Canyon, Northwest Area, Utah DOF. Four miles northeast of Tooele, UT. Brush. Creeping and spotting. Structures threatened.

Jacks, Boise District, BLM. Twenty-one miles southwest of Bruneau, ID. Timber. Moderate fire activity. Natural gas pipeline threatened.

Rhyolite, Salt Lake District, BLM. One mile east of Tacoma, NV. Timber, brush and grass. Creeping, smoldering and torching. Structures threatened. Precipitation occurred over the fire area yesterday.

Clay Springs, Central Area, Utah DOF. Four miles south of Oak City, UT. Timber, brush and grass. Smoldering and isolated torching. Major power lines and gas pipeline threatened. Precipitation occurred over the fire area yesterday.

Stout, Boise District, BLM. Eleven miles north of Glenns Ferry, ID. Brush and grass. Moderate fire activity. Structures threatened.

Baboon, Cedar City District, BLM. Five miles southwest of Minersville, UT. Juniper and brush. Moderate fire activity with backing, creeping and torching.

Red Butte, Bear River Area, Utah DOF. Two miles east of Grouse Creek, UT. Timber. Minimal fire actvity. Precipitation occurred over the fire area yesterday.

Fontenelle, Bridger-Teton NF. Transfer of command from IMT 2 (Ourada) back to the local unit will occur today. Eighteen miles west of Big Piney, WY. Timber. Creeping. Precipitation occurred over the fire area yesterday.

Cedar Butte WSA, Idaho Falls District, BLM. Seventeen miles northwest of Blackfoot, ID. Brush and grass. Running fire. Structures threatened. Road closures in effect.

Hobble Complex, Arizona Strip District, BLM. Thirty miles south of St. George, UT. Pinyon pine and juniper. Moderate fire activity. Road closure in effect. Precipitation occurred over the fire area yesterday.

Midway, Idaho Falls District, BLM. Five miles southwest of Atomic City, ID. Brush and grass. Creeping and smoldering.

Knox, Power County. Fourteen miles east of Rockland, ID. Timber, brush and grass. Smoldering.
C Fire, Idaho Department of Lands. Transfer of command from IMT 2 (Sommer) back to the local unit will occur tomorrow. Twelve miles east of Donnelly, ID. Timber. Smoldering.

Plateau, Arizona Strip District, BLM. Fifty miles south of St. George, UT. Pinyon pine, juniper and brush. Smoldering.

* North Lucky 7, Bear River Area, DOF. Five miles west of Etna, UT. Juniper and grass. Moderate fire activity. Structures threatened. Precipitation occurred over the fire area yesterday.
* Trapper Cabin, Twin Falls District, BLM. Eight miles northwest of Minidoka, ID. Brush and grass. Running.

Wolf Den, Vernal District, BLM. Forty miles south of Vernal, UT. Pinyon pine, juniper and brush. No new information.

This table does not include fires reported in the large fire section of this report. Updated weekly.

Predictive Services Discussion: Scattered showers and thunderstorms will increase across much of the interior West with heavy rain possible in the Southwest and Great Basin. Showers and thunderstorms will also continue over much of the South from Texas to the mid-Atlantic and spreading into the Great Lakes region. The Plains will remain generally dry and warm. In Alaska, rain will spread across the South and West with scattered showers and isolated thunderstorms developing in the North.

Predictive Services Outlook products: http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm

# Today's discussion is from the Motorized Operations Category. 

## ATV Transport

## ATV Loading/Unloading

Loading/unloading of ATVs has resulted in serious injury and even death to employees. Only those who have been fully trained in ATV operations should conduct loading/unloading procedures. The following safety measures are recommended:

- Wear all PPE (including gloves, helmet, etc.) until ATV is either secured or unloaded

Ensure header board (board placed in front of bed of truck or trailer) is in place and in good condition

ATV tire ramps should be secure to trailer or tail gate and on level terrain
If possible, use a tilt trailer to haul an ATV. If this is not feasible, try to lower back end of vehicle so slant of loading ramp is reduced. Back into ditch, hillside, or anything else to try and lower back end of vehicle

When loading ATV onto vehicle or trailer, keep seated, and lean body weight forward on ATV.

When unloading ATV, keep seated and keep weight forward. This helps keep ATV from flipping over backwards.

Never load or unload an ATV with a load on the racks. Load all ATVs empty.

## Securing ATV for transport

ATVs improperly loaded can be dangerous to you and other highway users. Steering can be affected if your load is not properly distributed and if not properly secured, can become dislodged and damage equipment and cause injury or death during a quick stop or crash.

Drivers are responsible for their load—regardless who actually loads equipment. All drivers are responsible for:

Inspecting the ATV
Recognizing overloads and poorly balanced weight
Knowing the gear loaded on the ATV is securely tied down.

## Securing ATV's:

Secure ATV in its normal operating position (on all four wheels)
Set the parking brake and place transmission in gear
Turn fuel valve OFF
Use chock (that fits snugly against wheels) in front and back of ATV. Front end header boards should also block forward movement of ATV.

Tie down ATV on at least each corner--use tie downs made from one inch nylon strap or greater, with hooks at each end and that have ratcheting buckles (ordinary rope should not be used due to stretching) or tie down straps that will lock in place.

ATVs should never be hauled with a load attached to the cargo racks. Hazard exists of losing the load from the ATV while in transit.
