

**National Interagency Coordination Center
Incident Management Situation Report
Sunday, July 22, 2012 – 0530 MT
National Preparedness Level 3**

National Fire Activity

Initial attack activity:	Moderate (230 new fires)
New large fires:	7 (*)
Large fires contained:	2
Uncontained large fires: **	25
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	4

** Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

Four MAFFS C-130 aircraft and support personnel from the 302nd Airlift Wing, Colorado Springs (US Air Force Reserve) and the 146th Airlift Wing, Channel Islands (California Air National Guard), are supporting wildland fire suppression operations out of Boise, ID.

Rocky Mountain Area (PL 4)

New fires:	68
New large fires:	4
Uncontained large fires:	10
Type 1 IMTs committed:	1
Type 2 IMTs committed:	3

Myrtle, Black Hills NF. IMT 1 (Hahnenberg). One mile east of Pringle, SD. Timber and hardwood litter. Active fire behavior with group tree torching. Structures threatened. Road closures and evacuations in effect.

Long Horn Complex (2 fires), Rosebud Agency, BIA. IMT 2 (Lowe). Eighteen miles southwest of Rosebud, SD. Timber, brush and grass. Active fire behavior with group tree torching. Structures threatened. Evacuations in effect. Reduction in acreage due to more accurate mapping.

* **Fairfield Creek**, Nebraska DOF. IMT 2 (Pechota). Two miles south of Norden, NE. Timber and grass. Extreme fire behavior. Structures threatened. Road closures and evacuations in effect.

* **Little Duck**, White River Field Office, BLM. Fifteen miles southeast of Rangely, CO. Juniper, sagebrush and grass. Active fire behavior. Precipitation occurred over the fire area.

Powell, White River Field Office, BLM. IMT 2 (Richardson). Nine miles northwest of Meeker, CO. Juniper, sagebrush and grass. Moderate fire activity. Structures threatened.

Brush Creek, White River Field Office, BLM. Thirty miles south of Rangely, CO. Timber. Active fire behavior with isolated torching. Structures threatened. Evacuations in effect.

* **Mossagate**, Nebraska NF. Ten miles northwest of Edgemont, SD. Sagebrush and grass. Extreme fire behavior. Structures threatened.

* **Conway**, Little Snake Field Office, BLM. Fifteen miles southeast of Browns Park, CO. Juniper, sagebrush and grass. Active fire behavior with torching and spotting. Structures threatened.

Sawmill Canyon, Wyoming State Forestry. Ten miles northwest of Guernsey, WY. Timber. Creeping and smoldering. Reduction in acreage due to more accurate mapping.

Predictive Services Discussion: High pressure over the central U.S. will keep very high temperatures across the Plains and Midwest while warming and drying will occur across much of the West. Scattered showers and thunderstorms will form over the Southwest, the eastern Great Basin and the Rockies. Thunderstorms will also develop across much of the Southeast with showers and a few thunderstorms moving through the Great lakes and New England.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.html>

Today's discussion is from the
Fireline Safety Category.

BUILDING FIRELINE DOWNHILL WITH FIRE BELOW

As a general rule, construct line moving uphill. Many firefighters have lost their lives attacking wildland fires from above. If there is no practical alternative to constructing line downhill, proceed only after weighing the following considerations:

- Has the area been scouted for fire perimeter and behavior? Discuss what you need to know about the fire perimeter and fire behavior before building fireline downhill with fire below.
- Will wind direction be at your back? Will it stay at your back? Talk about how winds can change when you are on a slope (e.g., time of day, upslope and down slope breezes, etc.).
- Is the area free of chimneys and gullies? How would you negotiate your line location if there were chimneys and gullies below where you needed to be working?
- Are there adequate safety zones and escape routes as you progress downhill? How do you maintain adequate safety zones and escape routes as you progress downhill?
- Can you carry your burnout downhill as you go to provide an anchor point and safety zones? Discuss how you decide when to carry the burnout with you or wait until you have tied in down below.
- Have lookouts been posted? What do the lookouts need to be on the watch for?
- Do you have good communications, especially with lookouts and crews working towards you? What are some of the dangers of not communicating with lookouts and crews working towards you? What are the benefits of maintaining good communications?
- Can the line be completed and burned out before the fire reaches the line? Discuss how this would affect where you locate the line.
- Do you have adequate resources to complete the assignment? What additional resources might you need to safely take on an assignment that includes building fireline downhill with fire below?
- Is aerial support available if needed? What benefits can aerial resources provide? What might be an added danger from aerial resources in this type of situation? (Common Denominators)
- Is aerial support available if needed? What benefits can aerial resources provide? What might be an added danger from aerial resources in this type of situation? (Common Denominators)
- Has everyone been briefed on the assignment, fire behavior, weather, communications, escape routes and safety zones, hazards and tactics? Discuss who might provide this briefing and where and when it might occur.
