Predictive Services Discussion: Widely scattered thunderstorms will form over the central Great Basin and the southern and central Rockies. Temperatures will continue to rise in the West under high pressure aloft. Scattered showers and thunderstorms will move through the Mississippi Valley and the Great Lakes region. Cooler conditions will settle into the northern and central Plains, while mild conditions continue in the Northeast.

## RESPONDING TO VEHICLE FIRES

Suppression of vehicle fires is extremely dangerous and poses many health hazards to firefighters. The following procedures are recommended:

Secure the scene and provide or request assistance for traffic control.
Provide for your escape route at the scene.

Do not use road flares if fuel is leaking from the vehicle or if wildland fuel is nearby.

- Vehicle fires are considered a hazardous materials scene. Suppression action should only be taken if the crew is trained, equipped, and authorized in the use of Self-Contained Breathing Apparatus (SCBA).
- If taking suppression action on wildland fuels, firefighters should ensure that they are a safe distance from the burning vehicle ( 100 -feet minimum), and avoid contact with vehicle fire smoke or fumes.
- Check vehicle for hazmat placard
- Vehicle fires in remote areas are often associated with illegal drug manufacturing - request and wait for law enforcement
