Predictive Services Discussion: Scattered thunderstorms will develop across the central and eastern Great Basin, northern Arizona and the central Rockies. Cooler but dry conditions will settle in over the Northwest, the northern Great Basin and the northern Rockies. Scattered thunderstorms will develop over the mountains of southern California. In the East, conditions will remain quiet and mild over the Great Lakes and New England regions. Scattered thunderstorms associated with remnants of Hurricane Isaac will continue from eastern Texas and Oklahoma to Georgia and the Carolinas.

## UNFAMILIAR WITH WEATHER AND LOCAL FACTORS INFLUENCING FIRE BEHAVIOR

- Ask questions of local experts! What kinds of questions would you ask?
- Does the operational period plan give you adequate weather and information? What kinds of weather forecasts can you get? What other weather or local information do you look for in the shift plan?
- Can you get information from resources that have been on the fire? What questions will you ask of the crew that you are replacing?
- Is there any other way to obtain information? List common sources of information on weather and local factors (Examples: Web based weather Activity Planner, Point Forecast Matrix, NOAA Internet Briefing)
- To reduce risks:
- Base all actions on current and expected fire behavior.
- Post lookouts.
- Establish escape routes and safety zones.
- Take extra caution! Discuss a fire where you relied on information from the local unit (perhaps where your fire knowledge and experience was very different from how they did things-southeast or Alaska).
- Recognize and report visual indicators (clouds, WX obs., cold front passage, inversion breaking
