National Interagency Coordination Center Incident Management Situation Report Monday, October 8, 2012 – 0530 MT National Preparedness Level 2

National Fire Activity

Initial attack activity: Light (36 new fires)

New large fires: 1 (*)
Large fires contained: 0
Uncontained large fires: ** 17
Area Command Teams committed: 0
NIMOs committed: 0
Type 1 IMTs committed: 1
Type 2 IMTs committed: 5

Link to Geographic Area daily reports.

Northwest Area (PL 2)

New fires: 7
New large fires: 0
Uncontained large fires: 9
Type 2 IMTs committed: 2

St. Marys Mission Road, Colville Agency, BIA. IMT 2 (Johnson). Three miles southwest of Omak, WA. Timber, brush and grass. Backing fire with single tree torching. Structures threatened. Evacuations and road closures in effect.

Powerline #2, South Puget Sound Region, Washington DNR. Transfer of command from IMT 2 (LaFave) back to the local unit will occur today. Two miles northeast of Shelton, WA. Timber and grass. Creeping and smoldering.

Wenatchee Complex (5 fires), Okanogan/Wenatchee NF. Two miles west of Wenatchee, WA. Timber, brush and grass. Numerous residences threatened. No further information received.

Cascade Creek, Gifford Pinchot NF. Eight miles north of Trout Lake, WA. Timber. No new information.

Pole Creek, Deschutes NF. Six miles southwest of Sisters, OR. Timber. Creeping and smoldering.

This table does not include fires reported in the large fire section of this report. <u>Updated weekly.</u>

Predictive Services Discussion: A cold front will drop into the northern Rockies and northern Plains, bringing colder conditions to the region and scattered snow to the Montana Front Range. Temperatures over most of the West will remain mild, with some cooler temperatures along the West Coast. High pressure over the Plains and the East will keep mild conditions in place. Scattered rain and snow showers will move across the upper Midwest while a few showers and thunderstorms form across the Mid-Atlantic States.

http://www.predictiveservices.nifc.gov/outlooks/outlooks.html

Today's discussion is from the First Aid/Health Category.

Fatigue/Stress

Accumulated (Chronic) Fatigue is defined as fatigue from which normal rest does not produce recovery. Accumulated fatigue is often caused by extended periods of stress with inadequate recovery periods, which results in decreased productivity, compromised immune function, and reduced alertness. Fatigued workers perform poorly, behave carelessly, tolerate greater errors and become inattentive. Chronic fatigue often results in increased stress, which may present itself through certain behavioral and physiological indicators, such as those described below:

- Behavioral indicators
 - Decreased motivation and low morale
 - Increased irritability and depression
- Physiological indicators
 - Confused, poor problem solving
 - Poor abstract thinking
 - poor attention/decisions
 - poor concentration/memory
 - extreme emotional responses
 - social/behavioral changes
- Recommendations for chronic fatigue/stress are:
 - Take longer periods of rest/recovery
 - Ensure that workers are adequately rested before they begin work shifts
 - Provide periodic rest breaks to allow physical and mental recovery
 - Alternate between heavy and light tasks
 - Eat well-balanced meals regularly, with energy supplements during periods of high exertion
 - Maintain hydration
 - Ensure workers maintain good personal hygiene
 - Maintain high standards of physical fitness and work capacity
 - In extreme cases, personnel may need to be relieved of their duties
