National Interagency Coordination Center Incident Management Situation Report Monday, October 15, 2012 – 0530 MT National Preparedness Level 2

National Fire Activity

Initial attack activity:	Light (26 new fires)
New large fires:	1 (*)
Large fires contained:	1
Uncontained large fires: **	7
Area Command Teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	0
Type 2 IMTs committed:	1
** Uncontained large fires include only fires b	eing managed under a full suppression
strategy. Link to Geographic Area daily reports.	
LITIK to Geographic Alea daily reports.	

Rocky Mountain Area (PL 2)

New fires:	2
New large fires:	0
Uncontained large fires:	1
NIMOs committed:	1

Fern Lake, Rocky Mountain NP. Transfer of command from NIMO (Kleinman) back to the local unit will occur tomorrow. Three miles west of Estes Park, CO. Timber. Smoldering.

This table does not include fires reported in the large fire section of this report. Updated weekly.

Predictive Services Discussion: A strong ridge of high pressure off the California Coast will bring warm and dry conditions to California, the desert Southwest and the Great Basin. It will be windy and dry over the Plains States from New Mexico and Texas northward to South Dakota behind a cold front that will be over the East Coast. The cold front will bring scattered showers and thunderstorms from New England south to Florida. A trough will continue to bring showers to the Pacific Northwest and Northern Rockies.

http://www.predictiveservices.nifc.gov/outlooks/outlooks.html

Today's discussion is from the Fireline Safety Category.

TERRAIN AND FUELS MAKE ESCAPE TO SAFETY ZONES DIFFICULT

When fighting wildland fires, it is often easy to get committed to areas that put you in Watchout Situation #17. As firefighters progress along the fireline, it is imperative to constantly keep the following considerations in mind:

- Base retreat times on the slowest member of the crew.
- Does the crew's condition allow for fast travel? Discuss physical and mental conditions that could interfere with a crew's ability to travel quickly.
- Will you get adequate warning to make it to your safety zone? Who will you rely on to warn you? How will you ensure that everyone gets the word?
- Can escape routes be improved to make travel to safety zones faster? Are escape routes marked? Review what you have done on past fires to locate, mark, and improve escape routes.
- Will posting more lookouts give adequate warning? Talk about situations where there was more than one firefighter assigned to be lookout.
- To reduce the risks:
 - Consider other tactics that will allow you to be in a safer location. Review fires where you have had to change tactics because escape to safety zones was not adequate.
