

**National Interagency Coordination Center
Incident Management Situation Report
Friday, May 24, 2013 – 0530 MT
National Preparedness Level 1**

National Fire Activity

Initial attack activity: Light (92 new fires)
 New large fires: 1 (*)
 Large fires contained: 0
 Uncontained large fires: ** 3
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 0
 Type 2 IMTs committed: 0

** Uncontained large fires include only fires being managed under a full suppression strategy.

Predictive Services Discussion: An upper low will drift around the Northwest today. Scattered showers, with some snow at the higher elevations, will develop from the Northwest Coast to the northern Rockies. Strong southwest flow around the upper system will produce critical fire weather conditions over the Southwest with gusty winds and low relative humidity. A building high pressure ridge will warm the Plains. Isolated to widely scattered thunderstorms are possible from the Dakotas to West Texas. A broad trough in the East will bring cooler temperatures as far south as the Tennessee Valley. Rain and thunderstorms will move across New England.

Aviation Category

Department of Interior (DOI) and U.S. Forest Service (USFS) maintain one of the most powerful aviation accident prevention tools in the industry, the SAFECOM system (www.safecom.gov). SAFECOM's are reports of conditions, observations, acts, maintenance problems, or circumstances which involve personnel or aircraft that has caused or has the potential to cause an aviation-related mishap. SAFECOM's provide immediate information to leaders at all levels of the organization which enables them to document, track, correct and convey lessons learned in a timely manner.

The SAFECOM system is often misunderstood, under-utilized and occasionally misused. Failure to understand and use the system effectively can prolong unsafe situations, increase costs, and in a worst case scenario result in a mishap, injury or loss of life.

The goal is to create a "Reporting Culture" where people are encouraged to voice safety issues and concerns without fear of reprisal or reprimand. It is important we maintain a "just culture" that encourages open and honest reporting of mistakes, failures, as well as our successes. It is essential that we continually learn from our experiences, good and bad, to improve our effectiveness. A robust reporting culture is vital in communicating potential hazards or trends for use in mishap prevention.

The SAFECOM system IS NOT intended for initiating punitive actions, NOT to be used as a complaint system or for personal attacks, NOT to be used by contracting officers for contract evaluations/award purposes, NOT to be used as a substitute for "on-the-spot" corrections to a safety concern, and does NOT replace the requirement for initiating an accident or incident report.

SAFECOM's provide the necessary feedback for development of the following communication tools:

- Accident Prevention Bulletins
- Lessons Learned
- Safety Alerts
- Technical Bulletins
- Information Bulletins
- Airwards
- Safety trends
- Training needs
- SAFECOM Summaries

New SAFECOM system features include:

- SAFECOM submittal receipt and a notification when the SAFECOM is made public to submitter if they enter an email address on the SAFECOM
- SAFECOM Training Powerpoint
- SAFECOM Comment and Suggestion form
- Ability to upload pictures and documents (jpeg, gif and pdf)

Have an idea? Have feedback? Share it.
