Predictive Services Discussion: Strong winds combined with humidity in the single digits and teens will occur over Arizona, Utah, Wyoming, Colorado, and New Mexico. Scattered showers and thunderstorms will continue over the eastern half of the country. Cool with periods of rain from northern California and the Pacific Northwest eastward into Nevada, Idaho, and western Montana. It will be warm and dry over much of Alaska.
http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm RESPONDING TO VEHICLE FIRES

Miscellaneous Category

Suppression of vehicle fires is extremely dangerous and poses many health and safety hazards to firefighters. The following procedures are recommended:

- Wear a high visibility reflective vest or other high visibility clothing if available.
- Secure the scene and provide or request assistance for traffic control.
- Park your vehicle to provide a protective barricade for you and your crew. Position it so that an inattentive or drunk driver will hit your vehicle and not your crew. Your vehicle is expendable, you are not.
- Provide for your escape route at the scene.
- Do not use road flares if fuel is leaking from the vehicle.
- DO NOT BREATHE ANY SMOKE. Smoke from vehicle fires contains toxic chemicals that will kill you.
- Vehicle fires are considered a hazardous materials scene. Suppression action should only be taken if the crew is trained, equipped, and authorized in the use of Self-Contained Breathing Apparatus (SCBA).
- If taking suppression action on wildland fuels, firefighters should ensure that they are a safe distance from the burning vehicle ( 100 -feet minimum), and avoid contact with vehicle fire smoke or fumes.
