## Southwest Area (PL 1)

New fires:4

New large fires: $\quad 1$
Uncontained large fires:
French Gulch, Phoenix District, Arizona State Forestry Division. Six miles east of Yarnell, AZ. Juniper, brush and grass. Moderate fire behavior. Residence threatened.

* White, Tonto NF. Five miles south of Superior AZ. Slash and brush. Minimal fire behavior. Last report unless significant activity occurs.

Predictive Services Discussion: Scattered thunderstorms will develop over the Rockies from Wyoming to New Mexico and across the Great Basin. Thunderstorms will also form over northern and central California, southern Oregon and central Idaho. Some storms, particularly over the Great Basin, have the potential to produce heavy rain. Scattered thunderstorms will continue across much of the Southeast. Some showers will move through the upper Midwest. Temperatures will remain warm over the West, with hot conditions in the desert Southwest. The Plains will remain very warm, with slightly cooler conditions in the East.

UNBURNED FUEL BETWEEN YOU AND THE
FIRE

Fireline Safety Category

It is important for firefighters to recognize unburned fuel between themselves and the fire as Watchout Situation \#11. Often it is not possible or practical for direct attack on a fire. Before attempting indirect attack and any time the firefighter is in a position where there is unburned fuel between them and the fire, the following questions must be addressed immediately:

- Can you see the fire or are you in contact with someone who can? Discuss situations you might find yourself in where you are out in the green and cannot see the fire. What can you do?
- Is fire spread in a direction away from you? Do you consider the potential for fire spread? Are you safe if the wind switches?
- Will your position be defensible when the fire reaches you? Talk about what must be taken into account when building indirect line or approaching a fire through the green.
- Is your line anchored? Discuss how you anchor indirect line.
- Are your escape routes and safety zones adequate? What is adequate?
- Are weather indicators constantly changing?
- To reduce the risks:
- Post lookouts
- Consider a different location. Review situations where you constructed indirect line or approached a fire through the green and how you provided for your safety.
