National Interagency Coordination Center Incident Management Situation Report Friday, January 31, 2014 – 0800 MT National Preparedness Level 1

National Fire Activity (Weekly Total)

Initial attack activity:	Light (858 new fires)
New large fires:	17 (*)
Large fires contained:	14
Uncontained large fires: **	4
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0

** Uncontained large fires include only fires being managed under a full suppression strategy.

Link to Geographic Area daily reports.

Southern Area (PL 1)	
New fires:	753
New large fires:	14
Uncontained large fires:	2

* **Indian Ridge**, Cherokee Nation Tribe. Twenty-two miles northeast of Sallisaw, OK. Timber and litter. Creeping and smoldering. Structures threatened.

* **Shoe Barn**, National Forests in Alabama. Three miles south of Double Springs, AL. Timber. Backing and flanking fire.

COMMON DENOMINATORS OF FIRE BEHAVIOR ON TRAGEDY FIRES

Fireline Safety Category

Five common denominators that contribute to accidents/incidents have been identified through studies of tragedy fires. It is important for firefighters to readily recognize the following common denominators so that future tragedies can be prevented:

- Most incidents happen on smaller fires or on isolated portions of larger fires.
- Most fires are innocent in appearance before unexpected shifts in wind direction and/or speed results in flare-ups or extreme fire behavior. In some cases, tragedies occur in the mop-up stage.
- Flare-ups generally occur in deceptively light fuels, such as grass and light brush.
- Fires run uphill surprisingly fast in chimneys, saddles, gullies, and on steep slopes.
- Some suppression tools, such as helicopters or airtankers, can adversely affect fire behavior. The blasts of air from low-flying helicopters and airtankers have been known to cause flareups.
