# National Interagency Coordination Center Incident Management Situation Report <br> Wednesday July 16, 2014 - 0530 MT National Preparedness Level 3 

## National Fire Activity

| Initial attack activity: | Moderate (202 new fires) |
| :--- | :---: |
| New large fires: | $9\left(^{*}\right)$ |
| Large fires contained: | 3 |
| Uncontained large fires: ** | 28 |
| Area Command Teams committed: | 0 |
| NIMOs committed: | 0 |
| Type 1 IMTs committed: | 3 |
| Type 2 IMTs committed: | 9 |
| ** Uncontained large fires include only fires being managed under a full suppression strategy. |  |
| Link to Geographic Area daily reports. |  |

## Northwest Area (PL 3)

New fires: 64
New large fires: 8
Uncontained large fires: 18
Type 1 IMTs committed: 1
Type 2 IMTs committed: 8
Mills Canyon, Southeast Region, Washington DNR. IMT 1 (Lewis). IMT is also managing the Chiwaukum Creek fire. Two miles southwest of Entiat, WA. Timber, brush and grass. Creeping and smoldering. Numerous residences threatened. Evacuations have been lifted. Precipitation occurred over the fire area yesterday.

* Chiwaukum Creek, Okanogan/Wenatchee NF. Nine miles northwest of Leavenworth, WA. Timber. Crowning and long-range spotting. Structures threatened. Evacuations in effect.

Moccasin Hill, Klamath Unit, Oregon DOF. IMT 2 (Cline). Four miles north of Sprague River, OR. Timber and brush. Creeping and smoldering.

Buzzard, Burns District, BLM. IMT 2 (Watts). Thirteen miles northwest of Riverside, OR. Juniper, brush and grass. Extreme fire behavior. Structures threatened.

Waterman Complex, John Day Unit, Oregon DOF. IMT 2 (Johnson) Twenty miles northeast of Mitchell, OR. Timber, brush and grass. Active fire behavior with group torching and long-range spotting. Structures threatened. Evacuations and road closures in effect.

Bridge 99 Complex, Deschutes NF. IMT 2 (Fillis). Eighteen miles north of Sisters, OR. Mixed conifer, brush and grass. Active fire behavior. Road closures in effect.

Lamb Ranch, Burns District, BLM. Fifteen miles northwest of Riverside, OR. Juniper, brush and grass. Extreme fire behavior.

* Beaver Creek, Burns District, BLM. Twelve miles south of Crane, OR. Juniper, brush and grass. Extreme fire behavior. Structures threatened.

Twin Reservoir, Burns District, BLM. Seven miles north of Princeton, OR. Juniper, brush and grass. Extreme fire behavior. Structures threatened.

White River, The Dalles Unit, Oregon DOF. IMT 2 (Buckman). Fifteen miles west of Maupin, OR. Timber. Smoldering. Structures threatened.

Saddle Draw, Vale District, BLM. Nineteen miles southeast of Crane, OR. Grass. Extreme fire behavior. Residences threatened.

* Gumboot, Burns District, BLM. Four miles north of Riley, OR. Timber, brush and grass. Moderate fire behavior.
* Shaniko Butte, Warm Springs Agency, BIA. IMT 2 (Williams). Fifteen miles north of Warm Springs, OR. Juniper, brush and grass. Extreme fire behavior. Structures threatened. Evacuations in effect.
* Pittsburg, Wallowa-Whitman NF. IMT 2 (Johnson). Twenty-two miles northwest of Riggins, ID. Brush and grass. Extreme fire behavior. Residences threatened.

290 RN Jack Knife, Prineville District, BLM. Previously reported as Jack Knife. Nine miles southwest of Shaniko, OR. Juniper and grass. Active fire behavior.

* Pine Creek, Prineville District, BLM. Eleven miles south of Fossil, OR. Brush and grass. Active fire behavior.
* Sunflower, Umatilla NF. IMT 2 (Wilde). Ten miles north of Monument, OR. Timber. Running, torching and spotting. Structures threatened.
* Hurricane Creek, Wallowa-Whitman NF. Five miles southwest of Joseph, OR. Timber. Moderate fire behavior with spotting.

Predictive Services Discussion: Isolated wet thunderstorms are anticipated for portions of the western Great Basin and northern California today. Elsewhere across the Intermountain West it will be hot, dry and locally breezy, especially in the Pacific Northwest. Scattered wet thunderstorms will continue today over the southwest U.S and central Rockies as well as the central High Plains region. The Mid-Atlantic and Gulf coastal states will see thunderstorms along an extensive frontal boundary that is slowly moving eastward today.

## SERIOUS INJURY PROCEDURES

Firefighter Health \& First Aid

Dealing with serious injuries on the fireline can add even more stress to our hectic work environment. In the event a fireline accident occurs, adherence to the following principles is important to insure an adequate and appropriate response is made.

- Before entering the scene, determine whether it is safe to approach. Look for hazards as well as what may have happened. It may be necessary to move the patient or to make the area safe before doing an assessment.
- Provide first aid and assess the extent of the injuries.
- Make contact with your supervisor. Depending on the complexity of the fire, that could be your crew boss, the Division Supervisor, the IC, or even dispatch. If your fire has a medical plan, follow the plan.
- Provide them with accurate, concise information on the following
- Number of people injured
- Type of injuries
- Severity of injuries (light, moderate, severe, life threatening)
- Mechanism of injury
- Vital signs (pulse, respirations, level of consciousness, etc)

Determine the best method of evacuation. Depending on the severity of injury or availability of resources, this decision may already be made for you.

- Keep the radio frequency clear of non-emergency traffic, provide updates of the patient's condition and await instructions.
- If evacuation is by helicopter, it may be necessary to construct a helispot. Document treatment provided in case it is necessary to send the information along with the patient in the aircraft.
- If the patient needs to be carried to a road, insure enough people are available to work in relays.

Once the patient is clear, take a moment to write down witness statements, clean up notes and timelines, and document any other pertinent information.
