# National Interagency Coordination Center <br> Incident Management Situation Report <br> Friday, July 25, 2014 - 0530 MT <br> National Preparedness Level 3 

## National Fire Activity

| Initial attack activity: | Light (169 new fires) |
| :--- | :---: |
| New large fires: | $8\left(^{*}\right)$ |
| Large fires contained: | 2 |
| Uncontained large fires: ** | 37 |
| Area Command Teams committed: | 0 |
| NIMOs committed: | 1 |
| Type 1 IMTs committed: | 6 |
| Type 2 IMTs committed: | 15 |
| ** Uncontained large fires include only fires being managed under a full suppression strategy. |  |
| Link to Geographic Area daily reports. |  |

Two MAFFS C-130 air tankers and support personnel from the $153{ }^{\text {rd }}$ Airlift Wing (Wyoming Air National Guard) have been deployed to Boise, ID to support wildland fire suppression operations in the western U.S.

## Northwest Area (PL 5)

New fires: 40
New large fires: 2
Uncontained large fires: 23
NIMOs committed: 1
Type 1 IMTs committed 5
Type 2 IMTs committed 13

* Kitten Complex (4 fires), Vale District, BLM. IMT 1 (Poncin). Includes previously reported Brogan Hill, Kitten Canyon, Stemler, and Juniper incidents. Twelve miles south of Ironside, OR. Brush. Active fire behavior. Structures threatened. Sage-grouse habitat threatened.

Camp Creek, Vale District, BLM. IMT 2 (Watts). IMT is also managing the Buzzard Complex. Eleven miles southeast of Juntura, OR. Brush. Active fire behavior. Sage-grouse habitat threatened.

Buzzard Complex, Burns District, BLM. Thirteen miles northwest of Riverside, OR. Juniper, brush and grass. Minimal fire behavior. Sage-grouse habitat threatened.

Rye Valley, Vale District, BLM. IMT 2 (Thorpe). Fifteen miles northwest of Huntington, OR. Brush. Running fire. Sage-grouse habitat threatened.

Carlton Complex, Northeast Region, DNR. IMT 1 (Oplinger), IMT 2 (Rabe), IMT 2 (Allbee) and NIMO (Hahnenberg). Started on private land seven miles south of Twisp, WA. Timber, light logging slash and brush. Minimal fire behavior. Numerous residences threatened. Evacuations, area and road closures in effect.

Chiwaukum Complex, Okanogan/Wenatchee NF. IMT 1 (Lewis) and IMT 1 (Dueitt). IMT is also managing the Mills Canyon fire. Nine miles northwest of Leavenworth, WA. Timber, heavy logging slash and brush. Creeping and smoldering. Numerous residences threatened. Evacuations, area and road closures in effect.

Mills Canyon, Southeast Region, Washington DNR. Two miles southwest of Entiat, WA. Timber, brush and grass. Creeping and smoldering. Area closures in effect.

Ochoco Complex (2 fires), Ochoco NF. IMT 2 (Dunford). Twenty-eight miles east of Prineville, OR. Timber. Minimal fire behavior. Structures threatened. Sage-grouse habitat threatened.

Logging Unit Complex (5 fires), Warm Springs Agency, BIA. IMT 1 (Schulte). Twenty-five miles northwest of Warm Springs, OR. Timber, medium logging slash and brush. Creeping and smoldering. Structures threatened.

Sunflower, Umatilla NF. Transfer of command from IMT 2 (Wilde) back to the local unit will occur tomorrow. Ten miles north of Monument, OR. Timber and grass. Creeping and smoldering.

Pine Creek, Prineville District, BLM. Transfer of command from IMT 2 (Fry) back to the local unit will occur tomorrow. IMT is also managing the Donnybrook and Black Rock fires. Eleven miles south of Fossil, OR. Juniper, brush and grass. Smoldering.

Donnybrook, Prineville District, BLM. Ten miles southeast of Antelope, OR. Juniper, brush and grass. Smoldering.

Black Rock, Prineville District, BLM. Started on private land ten miles east of Antelope, OR. Juniper and grass. Smoldering.

Waterman Complex, John Day Unit, Oregon DOF. Transfer of command from IMT 2 (Johnson) back to the local unit will occur tomorrow. Twenty miles northeast of Mitchell, OR. Timber, brush and grass. Creeping and smoldering with isolated torching. Structures threatened. Area and road closures in effect.

Bridge 99 Complex, Deschutes NF. Transfer of command from IMT 2 (Fillis) back to the local unit will occur $7 / 28$. Twenty miles north of Sisters, OR. Mixed conifer, brush and grass. Smoldering. Numerous structures threatened. Road and area closures in effect.

Shaniko Butte, Warm Springs Agency, BIA. Transfer of command from IMT 2 (Williams) back to the local unit will occur tomorrow. Fifteen miles north of Warm Springs, OR. Juniper, brush and grass. Minimal fire behavior. Structures threatened.

Bingham Complex (2 fires), Willamette NF. Transfer of command from IMT 2 (Nickey) back to the local unit will occur 7/27. Five miles east of Marion Forks, OR. Timber. Minimal fire behavior.

Center, Prineville District, BLM. Started on private land three miles northeast of Post, OR. Juniper, brush and grass. Minimal fire behavior.

Lone Mountain 1, North Cascades NP. IMT 2 (Hutton). Three miles northeast of Stehekin, WA. Timber and brush. Creeping. Area closures in effect. Precipitation occurred over the fire area yesterday.

Predictive Services Discussion: Breezy winds are expected for portions of the Rockies and the Great Basin today as drier air filters in behind a Pacific cold front. Otherwise, it will be warming and drying very quickly over the western U.S. as a ridge of high pressure strengthens. A warm front over the Mississippi Valley will help to trigger showers and thunderstorms with heavy precipitation, while further south a cold front will focus storms along the Gulf Coast.
http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm

This Day in History is a brief summary of a powerful learning opportunity and is not intended to second guess or be judgmental of decisions and actions. Put yourself in the following situation as if you do not know what the outcome will be. What are the conditions? What are you thinking? What are YOU doing?

## Dutch Creek Incident - July $\mathbf{2 5}^{\text {th }}$, 2008

Incident Summary: On June 12th, 2008, Andy Palmer graduates from high school. He completes Basic Firefighter training June $24^{\text {th }}$ and Wildland Fire Chain Saw training (S-212) June $28^{\text {th }}$. He is hired as a seasonal firefighter on an engine crew June $29^{\text {th }}$ and completes his A Faller taskbook on July 4th. July 22, 2008, the engine receives a resource order for the Iron Complex, California. The supervision at the park are motivated to see the engine crew obtain an assignment and call the crew in on their day off. The crew suffers a series of complications enroute to the fire including mechanical problems with the engine that lead to the eventual separation of the crew and engine captain after arriving at the incident. The remaining crew members are encouraged to pursue a line assignment as a falling team. The IMT personnel assign the crew as a falling module. During that assignment the crew cuts a tree that is outside their falling qualifications. A class C ponderosa pine is cut, falling downslope into a fire-damaged sugar pine. A portion of the sugar pine breaks off and falls upslope, hitting firefighter Andy Palmer, resulting in multiple severe injuries... and the loss of a firefighters' life. It was Andy's first fire assignment.

## Zero Hour. July $25^{\text {th }}$, a radio transmission comes into Iron Complex dispatch: "Man Down Man Down. We need help. Medical emergency. Dozer pad. Broken leg. Bleeding. Drop Point 72 and dozer line. Call 911, we need help."

The local Sheriff's office receives a call from incident command and begins inquiring for a helicopter. Two air medical services decline the mission due to poor visibility from smoke, California Highway Patrol's helicopter was not available and the US Coast Guard (USCG) had not yet been contacted.

Other firefighters arrive on scene. Nomex shirts are used as pressure bandages on shoulder and leg injuries. The injured firefighter is reported as having severe bleeding and being conscious. The severity of the injuries and the sense of urgency are not communicated to paramedics dispatched in an ambulance to the incident.

As the medics arrive on scene they realize the injuries are much more serious than they had been told and decide to facilitate a rapid evacuation via carryout.

Fifty-five minutes since the accident. The patient is prepared to move and the decision is made to go to the ambulance rather than waiting for the helicopter. The ambulance is approximately 2000 ft down the dozer line.

## One hour and 25 minutes since the accident.

A third paramedic has arrived on scene and the decision is made to wait for the helicopter. Firefighters start clearing a zone for hoist extraction.

One hour and 50 minutes since the accident. Multiple delays of the USCG helicopter are caused due to poor communications of patient status, potential use of a Forest Service helicopter assigned to the fire, and method of extraction. Once the USCG is enroute, communication about the new extraction location, radio frequencies and patient status is an issue and slows the extrication efforts. While being transferred to the hoist basket, personnel on the ground report profuse bleeding. No patient care can be given while being hoisted.

Two hours and 47 minutes since the accident. During the flight, cardiac arrest treatment protocol is initiated and the helicopter lands at Redding Municipal Airport with CPR in progress.

Three hours and 26 minutes since the accident. An ER Physician pronounced time of death, via radio. The Coroner later determined that Andy Palmer's death was caused by excessive blood loss.

## Lessons Learned Discussion Points

- Identify and discuss a variety of options for medical evacuation (ATV, wheeled litter, etc.) anticipating that a helicopter will not be available.
- If the crewmember sitting beside you were to be seriously injured on the fireline, what would you and your crew do? How thorough is your unit or IMT's Incident Emergency Plan? Consider doing a mock-up medical evacuation from start to finish. Utilize the new Medical Incident Report on page 108-9 of your IRPG to effectively communicate emergency information. Assess the drill with an AAR.
- Read page 2 in your IRPG.
