Predictive Services Discussion: An active period is underway for the Hawaiian Islands today as the first of two hurricanes,"Iselle", will bring heavy rainfall and severe winds. Breezy and dry weather will continue in the Pacific Northwest and Northern Rockies today as a weak cold front moves through from west to east. Isolated to widely scattered showers and thunderstorms will develop over the Sierra Nevada mountains, the Great Basin, and northern Rockies as residual moisture interacts with an upper level low pressure system moving into the northwest U.S. Widespread rain and thunderstorms will develop in the Four-Corners region as monsoonal moisture streams north toward the southern Plains. Showers and thunderstorms are also expected in the upper Mississippi Valley and the mid-Atlantic region along a stalled out frontal boundary.

# After Action Review part 2 

Fire Communication Category
The "Chainsaw" AAR

It's 0'dark thirty. The crew has worked the fire for sixteen hours straight. No one has eaten a hot meal for days and oh yeah, you might as well be cold. No time for the After Action Review? -- Think again!

It's time to bust out the ...CHAINSAW AAR.
The idea behind the Chainsaw AAR is simple; SPEED. When you need to get an After Action Review done quickly try this simple format.

1. Have the team form a loose circle.
2. Start with a single team member and ask one of these questions:

- What is one thing that went well on this shift?
- What is one thing that went bad on this shift?
- What is one thing you would do different next time?
- What is one thing you learned today?

3. Continue around the circle until everyone has had a chance. It may be necessary to place a time limit on each individual (i.e. 30 seconds).
4. Avoid unnecessary discussion (dinner is waiting).
5. Note the comments for future discussion.

The Wildland Fire Leadership Development Program website has multiple additional references on conducting effective AARs, many designed specifically for wildland firefighters and leaders.
