Predictive Services Discussion: Showers and thunderstorms will continue over much of the Pacific
Northwest and Great Basin today as an upper level disturbance settles over Washington with significant moisture. Dry and breezy conditions will develop over the Sierra Nevada mountains of northern California and Nevada. In the northern Rockies, it will be abnormally hot today under a ridge of high pressure. Monsoon moisture trapped under this ridge will continue to supply thunderstorms in the Rocky Mountain Four Corners region. It will be cooler than normal in the eastern U.S. with widespread showers and thunderstorms from the Gulf Coast through the mid-Atlantic. Rain is also expected in New England today.

## Today's discussion is from the Fireline Safety Category.

## DOZER/TRACTOR PLOW OPERATIONS

Dozers/tractor plows provide suppression and support capability for fire operations. When working on or around dozers on the fireline, it is important to respect the following guidelines:

- Load/unload equipment from the transport in a safe manner on a level, stable surface.
- Park transport in an area free of fuel. Clear an area if needed to protect parked equipment.
- Do not sit or bed down near equipment. Walk around the equipment before starting or moving it.
- Lower the dozer blade and/or fire plow to the ground when the equipment is idling or stopped.
- When working a dozer or tractor plow, stay at least 100 feet in front or 50 feet behind the equipment.
- Allow no one but the operator to ride on the equipment.
- Never get on or off equipment while it is moving.
- Provide front and rear lights for equipment working at night or in heavy smoke.
- Provide lights and fluorescent vests to personnel working with dozer/tractor plow units.
- Use hand signals for direction and safety. (See Fireline Handbook Appendix A or IRPG pg 91, for hand signals.)
- Do not use a dozer or tractor plow without a canopy or brush guard and radio communications.

Operators will wear required PPE and carry a fire shelter.

- Be aware of different fuel types, rates of spread, and flammability.
- Watch for wetlands, steep slopes, rocks, ditches, and other obstacles that might stop the equipment.

Do not get too far ahead of a firing crew during firing operations.
Anchor the line to a secure firebreak and create a black line (burn out) until the fire is completely enclosed.
Tractor plow operators should wear headgear protection for head, face, eyes, and ears while also providing radio reception and ventilation capabilities.

- Tractor plow crews should consist of a minimum of two people.
- When the dozer or tractor plow is equipped with a hand-clutch lever, always take equipment out of gear when mounting and dismounting.
