

**National Interagency Coordination Center
Incident Management Situation Report
Friday, January 16, 2015 – 0800 MT
National Preparedness Level 1**

National Fire Activity (Weekly Total)

Initial attack activity: Light (119 new fires)
 New large incidents: 0 (*)
 Large fires contained: 0
 Uncontained large fires: ** 0
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 0
 Type 2 IMTs committed: 0

** Uncontained large fires include only fires being managed under a full suppression strategy.

Additional wildfire information is available through the Geographic Areas at <http://gacc.nifc.gov/>.

Predictive Services Discussion: Moist westerly flow will precede a Pacific cold front and bring abundant precipitation to the Pacific Northwest and northern California on Friday. This will result in heavy rain and high elevation snowfall, especially in the Washington Cascades. Precipitation will spread eastward through the Intermountain West this weekend with heavy snow accumulations in the northern Rockies. Along the east Coast this weekend, an upper level storm system will generate heavy rain and strong winds from the Mid-Atlantic through New England, while temperatures remain cold for a few more days. By early next week, high pressure will restore it's grip over the western U.S., sending the storm track into the Rocky Mountain region and adjacent plains. A mid-week storm is anticipated for the southern Plains and Mississippi Valley as this energy taps in to Gulf moisture streaming northward.

MY SAFETY

Leadership Category

An important aspect of safety is individual responsibility for one's own health & safety. Even with the best supervision, each individual firefighter will occasionally be required to make personal decisions concerning their safety. It is important that individual responsibility be taught as the basis for a viable safety program. Some of those individual responsibilities are:

- Fitness for duty. Begin each work shift both mentally and physically prepared for the rigors of wildland firefighting. Getting adequate sleep, maintaining a healthy diet, and proactively participating in physical training are the foundation of "My Safety".
- Utilization of personal protective equipment. Wear your PPE without being told. Each individual is responsible for performing their own risk assessments. If a hazard is identified that can be mitigated by wearing a particular PPE component it should be utilized. Fireline supervisors have more important duties to focus on other than performing glove patrol.
- Following safe work practices. Using a spotter when backing up vehicles is the prudent and professional course of action. If you are unsure of how to perform a job task safely, ask your supervisor or experienced coworker.
- Using the correct reference materials is an important aspect of safety. You should have a working knowledge of the Red Book, IRPG, and your local operating guidelines.
- Ensure instructions are clearly understood. Communication is a basic responsibility for all fire personnel. Ask appropriate questions to clarify uncertain issues. Speak up when you observe hazards that may place yourself or others at risk.
- Maintain situational awareness at all times. Awareness is a vital component of "My Safety". Pay attention to what is happening around your area of operations. Always display an awareness of what is happening around you by asking questions or making comments.

Summary: Do not expect someone else to be responsible for your safety. Take it upon yourself to make "My Safety" your number one priority.

Discussions points:

1. *Talk about ways you can improve on your safety.*
2. *Have your supervisor talk about their expectations for individual safety.*

Have an idea? Have feedback? Share it.
