## National Fire Activity (Weekly Total)

| Initial attack activity: | Light (909 new fires) |
| :--- | :---: |
| New large incidents: | $38\left(^{*}\right)$ |
| Large fires contained: | 25 |
| Uncontained large fires: ** | 14 |
| Area Command Teams committed: | 0 |
| NIMOs committed: | 0 |
| Type 1 IMTs committed: | 0 |
| Type 2 IMTs committed: | 1 |
| ** Uncontained large fires include only fires being managed under a full suppression strategy. |  |
| Link to Geographic Area daily reports. |  |

On March $30^{\text {th }}$, a helicopter crashed while assigned to a prescribed fire on the Desoto Ranger District of the National Forests in Mississippi. The pilot and a crew member were fatally injured. The firefighting community extends condolences to family and friends of the deceased.

## Southern Area (PL 2)

New fires: 520
New large incidents: $\quad 17$
Uncontained large fires: 8
Type 2 IMTs committed: 1

* Weed Lane, North Carolina Forest Service. IMT 2 (Smith). One mile northwest of Ridgecrest, NC. Timber. Smoldering.
* Short Hills Mountain, Virginia Department of Forestry. Six miles north of Buchanan, VA. Hardwood litter. Active fire behavior. Structures threatened.
* Poplar, National Forests in North Carolina. Two miles north of Poplar, NC. Hardwood litter. Moderate fire behavior with flanking and backing. Residences threatened.
* Webster, Osage Agency, BIA. One mile west of Barnsdall, OK. Hardwood litter and grass. No fire behavior received.
* Hampton, Cherokee NF. Ten miles east of Tellico Plains, TN. Timber. No fire behavior received.
* Rocky Mountain, Northeast Area Oklahoma, DOF. Seven miles southeast of Tahlequah, OK. Timber and grass. No fire behavior received. Last report unless significant activity occurs.

[^0]* Branding Iron, Texas A \& M Forest Service. Three miles south of Nimrod, TX. Brush. No fire behavior received. Last report unless significant activity occurs.

*** Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments. ***
Additional wildfire information is available through the Geographic Areas at http://gacc.nifc.gov/.

Predictive Services Discussion: The southwest U.S. and Four Corners Region will remain dry and breezy through the next week. Aside from light rainfall this weekend through the central Plains, the region will return to dry and warm early next week as a ridge of high pressure builds from the southwest. It will also be relatively dry along the Gulf Coast through the period. Beginning this weekend, a strong low pressure system will bring an active weather pattern to the Northwest quarter of the Nation, including northern California and the northern Rockies with widespread showers and high-elevation snow, especially in the Cascade and Sierra mountain ranges. This system will continue to affect a broad area of the Intermountain West as it slowly moves into the Great Basin and Rocky Mountains through the middle of next week. A Canadian cold front is expected to bring another round of wintery weather from the Great Lakes states through New England. Further south, another swath of heavy precipitation is expected to stretch from the southern Plains to the Ohio Valley by the middle of next week.

## http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm

This report contains information derived from the National Fire and Aviation Management Web Applications (FAMWEB) system and other sources to provide relative information about emerging and ongoing incident activity. This information is considered operational in nature, is subject to change, and therefore may not match official year-to-date agency records.

## COMMUNICATIONS (LCES)

Fire Communications Category

Effective communication is a critical backbone of safe and successful operations.

- Discuss the factors that can affect radio communication at the incident.
- Knowledge of the radio issued to the individuals
- Net control, frequencies
- Line-of-sight restrictions
- Antenna polarization effect (direction of the antenna)
- Minimizing noise interference
- Wide band narrow band
- How can you mitigate potential problems?
- Implement effective communication procedures--be brief, use clear text, and to-the-point.
- Give a good comprehensive briefing. (Refer to the Briefing Checklist inside the back cover of the Incident Response Pocket Guide.)
- Confirm that relayed information is received, and understood.
- Keep a continuous information flow (e.g., updates on weather, fire behavior, work progress; changes in strategy/tactics; arrival of additional resources; solicit feedback).
- Establish emergency check-in procedures.
- Provide a minimum of 4 radios per 20-person firefighter crew.
- The Five Communication Responsibilities for All Firefighters:
- Brief others
- Debrief your actions
- Communicate hazards to others
- Acknowledge messages
- Ask if you don't know
