

**National Interagency Coordination Center  
Incident Management Situation Report  
Wednesday, June 10, 2015 – 0530 MT  
National Preparedness Level 1**

**National Fire Activity**

Initial attack activity: Light (113 new fires)  
 New large incidents: 2  
 Large fires contained: 0  
 Uncontained large fires: \*\* 4  
 Area Command Teams committed: 0  
 NIMOs committed: 0  
 Type 1 IMTs committed: 0  
 Type 2 IMTs committed: 0

\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

**Predictive Services Discussion:** The Pacific Northwest will see dry and windy conditions developing today in response to stronger westerly flow aloft. This will contrast with unsettled, moist weather for the rest of the western U.S. Tropical moisture and an upper level low pressure system will combine to produce widespread showers and scattered thunderstorms, especially in the Sierras of California, the Great Basin, and central Rockies. Generally drier and warm conditions are expected today east of the Rockies, with the exception of showers and thunderstorms over the southeast U.S. along a stalled frontal boundary. In Alaska, showers and thunderstorms are expected in association with a cold front.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

This report contains information derived from the National Fire and Aviation Management Web Applications (FAMWEB) system and other sources to provide relative information about emerging and ongoing incident activity. This information is considered operational in nature, is subject to change, and therefore may not match official year-to-date agency records.

# LEAD Time

## Leadership Environment

*Leadership Category*

Leadership is defined as the act of influencing people in order to achieve a result. The leadership environment is made up of critical elements that a successful leader must consider in planning for effective action. Those critical elements are:

- **YOU** - the leader, who is ultimately responsible for all action and results.
- **YOUR PEOPLE** - those that you are responsible for.
- **SITUATION** - comprised of the many unique variables that influence a leader's decision such as objectives, conditions, resources available, organizational influences, and others affected by the action.
- **CONSEQUENCES** - the short and long-term effects of your actions.

Leaders constantly assess the elements of the leadership environment and adapt accordingly. Successful leaders understand the interplay of these variables and demonstrate flexibility in selecting appropriate leadership tools and techniques as a situation changes.

### Discussion Points

- **Each mission has a different level risk. Discuss how the 4 leadership environment elements affect perceived risk in a changing environment.**
- **Each situation is unique and changes over time. Discuss what changes you might predict in your environment today.**
- **Discuss what leadership tools might be appropriate for those predicted changes today.**
