

**National Interagency Coordination Center  
Incident Management Situation Report  
Thursday, June 18, 2015 - 0530 MT  
National Preparedness Level 2**

**National Fire Activity**

Initial attack activity:	Light (130 new fires)
New large incidents:	7
Large fires contained:	1
Uncontained large fires: **	8
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	3

\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

**Alaska Area (PL 4)**

New fires:	0
New large incidents:	3
Uncontained large fires:	4
Type 1 IMTs committed	1
Type 2 IMTs Committed	1

\* **Card Street**, Kenai-Kodiak Area Forestry, DOF. IMT2 (Allbee). Started on tribal land five miles southeast of Sterling, AK. Timber. Extreme fire behavior with crowning, long-range spotting and wind-driven runs. Numerous structures threatened. Road, area and trail closures in effect.

\* **Sockeye**, Mat-Su Area Forestry, DOF. IMT1 (Doty). Started on private land six miles north of Willow, AK. Timber, brush and short grass. Active fire behavior with group torching and short crown runs. Numerous structures threatened. Evacuations, road, area and trail closures in effect.

\* **Tanana Slough**, Tok Area Forestry, DOF. Started on tribal land four miles north of Dot Lake, AK. Timber. Active fire behavior with torching, flanking and creeping. Structures threatened.

\* **Stetson Creek**, Chugach NF. Two miles southwest of Cooper Landing, AK. Timber and brush. Active fire behavior. Structures threatened. Evacuations and trail closures in effect.

\* **Healy Lake**, Delta Area Forestry, DOF. Twenty-eight miles southeast of Delta Junction, AK. Timber. Extreme fire behavior with crowning, running and flanking. Structures threatened. Last report unless significant activity occurs.

\* **Chisana River 2**, Tok Area, DOF. Previously reported incident. Started on NPS land 25 miles west of Beaver Creek, AK. Timber. Active fire behavior with group torching and wind-driven runs. Structures threatened. Last report unless significant activity occurs.

**Predictive Services Discussion** High pressure over the western half of the U.S. will bring hot and dry weather today, especially for the southwest quarter of the Nation. Dry and windy conditions will be favored on the eastern slopes of the Cascades and through the Columbia Basin of the Pacific Northwest region as well as northern California's higher terrain. The eastern half of the U.S. will generally see unsettled weather with showers and thunderstorms from the remnants of Tropical Storm Bill merging with a long wave trough of low pressure. Widespread rain and thunderstorms will stretch from the southern Plains and lower Mississippi Valley through the northeast U.S. High pressure centered over the Bering Sea will continue to bring hot and dry weather to Alaska, but there is still a chance of thunderstorms in the south central part of the state today.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

This report contains information derived from the National Fire and Aviation Management Web Applications (FAMWEB) system and other sources to provide relative information about emerging and ongoing incident activity. This information is considered operational in nature, is subject to change, and therefore may not match official year-to-date agency records.

## UNBURNED FUEL BETWEEN

### YOU AND THE FIRE

*Operational Engagement Category*

It is important for firefighters to recognize unburned fuel between themselves and the fire as Watchout Situation #11. Often it is not possible or practical for direct attack on a fire. Before attempting indirect attack and any time the firefighter is in a position where there is unburned fuel between them and the fire, the following questions must be addressed immediately:

- Can you see the fire or are you in contact with someone who can? Discuss situations you might find yourself in where you are out in the green and cannot see the fire. What can you do?
- Is fire spread in a direction away from you? Do you consider the potential for fire spread? Are you safe if the wind switches?
- Will your position be defensible when the fire reaches you? Talk about what must be taken into account when building indirect line or approaching a fire through the green.
- Is your line anchored? Discuss how you anchor indirect line.
- Are your escape routes and safety zones adequate? What is adequate?
- Are weather indicators constantly changing?
- To reduce the risks:
  - Post lookouts
  - Consider a different location. Review situations where you constructed indirect line or approached a fire through the green and how you provided for your safety.
