

**National Interagency Coordination Center  
Incident Management Situation Report  
Saturday, June 20, 2015 - 0530 MT  
National Preparedness Level 2**

**National Fire Activity**

Initial attack activity:	Light (91 new fires)
New large incidents:	2
Large fires contained:	0
Uncontained large fires: **	11
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	6

\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

**Alaska Area (PL 5)**

New fires:	2
New large incidents:	0
Uncontained large fires:	4
Type 1 IMTs committed:	1
Type 2 IMTs committed:	2

**Card Street**, Kenai-Kodiak Area Forestry, DOF. IMT2 (Allbee). Started on tribal land five miles southeast of Sterling, AK. Timber. Active fire behavior with isolated torching and spotting. Numerous structures threatened. Road, area and trail closures in effect.

**Sockeye**, Mat-Su Area Forestry, DOF. IMT1 (Doty). Started on private land six miles north of Willow, AK. Timber. Moderate fire behavior with group torching and backing. Numerous structures threatened. Evacuations, road, area and trail closures in effect.

**Stetson Creek**, Chugach NF. IMT2 (Goff) Two miles southwest of Cooper Landing, AK. Timber. Active fire behavior. Structures threatened. Evacuations, area and trail closures in effect. Reduction in acreage due to more accurate mapping.

**Tanana Slough**, Tok Area Forestry, DOF. Started on tribal land four miles north of Dot Lake, AK. Timber. Active fire behavior with short crown runs, group torching and spotting. Structures threatened.

**Healy Lake**, Delta Area Forestry, DOF. Twenty-eight miles southeast of Delta Junction, AK. Timber. Structures threatened. No new information. Last report unless significant activity occurs.

**Predictive Services Discussion** Strong high pressure over southern California has brought the hottest and driest conditions so far this season to the southwest U.S. Temperatures 10 to 15 degrees above normal will be accompanied by single digit humidity and locally breezy winds over much of the southwest and Great Basin. A series of weak low pressure troughs will continue to bring slightly cooler temperatures and higher humidity to the Pacific Northwest and northern Rockies, but no precipitation is expected with these disturbances. East of the Rockies, heavy rain and thunderstorms will stretch from the Ohio Valley through the northeast U.S. with residual moisture from Tropical Storm Bill. Isolated wet thunderstorms are also expected in the northern Plains. High pressure anchored over Alaska will continue to bring hot and dry weather with weak impulses over the south-central and central Interior regions of the state triggering isolated thunderstorms and gusty winds.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

This report contains information derived from the National Fire and Aviation Management Web Applications (FAMWEB) system and other sources to provide relative information about emerging and ongoing incident activity. This information is considered operational in nature, is subject to change, and therefore may not match official year-to-date agency records.

# Roadside Incident Response

*Vehicles/Roads Category*

Nationally, the number of injuries and fatalities among emergency responders who are responding to roadside incidents is increasing. Although most wildland fires occur in remote areas, there are situations where wildland fire personnel are responding to fires along rural country roads, jeep roads, or major highways; the risk still exists for our firefighters. Below is a checklist of considerations that should be utilized when responding to fires and other incidents along roadsides.

## ● **Considerations**

- Firefighter and public safety will always be the number one priority.
- Utilize L.C.E.S. in all incident activities.
- Personal Protective Equipment will be used on all incidents.

## ● **Upon Arrival at the Scene**

Size up incident. (See Incident Response Pocket Guide.)

- What has happened?
- What is happening?
- What will or could happen?
- Is this a HazMat situation?

## ● **Risk Management Process** - Decision Point, Go No Go. (See the Incident Response Pocket Guide, page 1.)

## ● **Tactical Considerations**

- Anytime traffic flow is affected by the incident, contact the jurisdictional law enforcement agency for assistance.
- Conduct all operations as far from traffic lanes as possible to provide for crew and public safety.
- Park units on the same side of the roadway whenever possible to avoid traffic congestion.
- Do not exit the fire apparatus until instructed to do so by the module leader.
- Exit the fire apparatus away from the roadway or where hazard exposure is minimized.
- Exit the fire apparatus with full personal protective equipment.
- Post a lookout to watch for and control oncoming traffic.
- Utilize forward and rear spotters when visibility is impaired or road conditions warrant.
- Utilize and place road flares or other traffic warning signs whenever possible.
- If equipment needs to be removed from the traffic side of the apparatus, one person should retrieve the equipment, and a lookout should watch for oncoming traffic.
- Operate pumps from the non-traffic side or from the cab of the apparatus when possible. Keep all hose, fire tools, and equipment out of traffic lanes when possible.
- During night operations, utilize reflective clothing, vests and other safety equipment as necessary.
- All emergency responses on roadways will be concluded as quickly as possible to reduce personnel exposure.
- Cancel or demob unnecessary apparatus as soon as possible.

- *\*\* Each agency emergency vehicle operator will follow their particular state laws and agency policies governing the operations of emergency vehicles.*
