

**National Interagency Coordination Center
Incident Management Situation Report
Sunday, July 5, 2015 - 0530 MT
National Preparedness Level 3**

National Fire Activity

| | |
|-------------------------------|-----------------------|
| Initial attack activity: | Light (145 new fires) |
| New large incidents: | 8 |
| Large fires contained: | 1 |
| Uncontained large fires: ** | 26 |
| Area Command Teams committed: | 0 |
| NIMOs committed: | 1 |
| Type 1 IMTs committed: | 2 |
| Type 2 IMTs committed: | 13 |

** Uncontained large fires include only fires being managed under a full suppression strategy.

Alaska Area (PL 5)

| | |
|--------------------------|---|
| New fires: | 0 |
| New large incidents: | 1 |
| Uncontained large fires: | 7 |
| Type 2 IMTs committed: | 6 |

Tanana Area Fires (9 fires), Tanana Zone, BLM. IMT2 (Staats). Started on native corporation land seven miles northeast of Tanana, AK. Timber. Extreme fire behavior with short crown runs and group torching. Numerous structures threatened. Evacuations in effect.

Middle Yukon Fires (4 fires), Galena Zone, BLM. IMT2 (Hutton). Started on native corporation land two miles north of Nulato, AK. Timber, brush and short grass. Minimal fire behavior with backing, creeping and smoldering. Numerous structures threatened.

Mission Creek, Southwest Area Forestry, DOF. Two miles northwest of Chuathbaluk, AK. Timber. No new information. Last report unless new information is received.

Rock, Tanana Zone, BLM. Started on native corporation land nine miles southeast of Hughes, AK. Timber. No new information.

Chahalie Lake, Upper Yukon Zone, BLM. Started on native corporation land 10 miles northeast of Chalkyitsik, AK. Timber. Minimal fire behavior with creeping and smoldering. Reduction in acreage due to more accurate reporting.

Baker, Tanana Zone, BLM. Four miles southwest of Eureka, AK. Closed timber litter. Active fire behavior with short crown runs, backing and creeping. Structures threatened.

Rex Complex (2 fires), Fairbanks Area Forestry, DOF. IMT2 (Sheldon). Started on private land seven miles southeast of Clear, AK. Timber, brush and tall grass. Minimal fire behavior with single tree torching, creeping and smoldering. Structures threatened. Road and trail closures in effect. Reduction in acreage due to more accurate reporting.

Aggie Creek, Fairbanks Area Forestry, DOF. IMT2 (Rosenthal). Thirty miles northwest of Fairbanks, AK. Timber. Active fire behavior with short crown runs, spotting and torching. Structures threatened. Area closures in effect.

Healy Lake, Delta Area Forestry, DOF. IMT2 (Bentley). IMT is also managing the Michigan Creek fire. Timber. Minimal fire behavior with smoldering. Structures threatened.

Michigan Creek, Delta Area Forestry, DOF. Thirty-eight miles northeast of Delta Junction, AK. Timber. Minimal fire behavior with smoldering.

Anaconda Creek, Fairbanks Area Forestry, DOF. Transfer of command from IMT2 (Allen) back to the local unit will occur tomorrow. Twenty-four miles northeast of Fairbanks, AK. Timber. Minimal fire behavior. Numerous structures threatened. Area and trail closures in effect.

Long Lake, Tok Area Forestry, DOF. Started on BIA land two miles east of Northway, AK. Timber. Moderate fire behavior with creeping. Structures threatened.

Tetlin Hills, Tok Area Forestry, DOF. Eight miles southeast of Tok, AK. Timber. Minimal fire behavior with creeping and smoldering. Structures threatened.

Nenana Ridge, Fairbanks Area Forestry, DOF. Twelve miles east of Four Mile Rd, AK. Light logging slash. Moderate fire behavior with smoldering.

Sockeye, Mat-Su Area Forestry, DOF. Started on private land six miles north of Willow, AK. Timber. Minimal fire behavior with creeping and smoldering. Numerous structures threatened.

North Aniak, Southwest Area Forestry, DOF. Two miles north of Aniak, AK. Timber and short grass. Moderate fire behavior with running, backing and flanking. Structures threatened. Last report unless significant activity occurs.

Munsatli, Tanana Zone, BLM. Previously reported incident. One hundred-seventeen miles southeast of Ruby, AK. Timber. Minimal fire behavior with creeping. Last report unless significant activity occurs.

Christian River #2, Upper Yukon Zone, BLM. Previously reported incident. Started on FWS land four miles northeast of Christian, AK. Timber. Minimal fire behavior with smoldering. Last report unless significant activity occurs.

* **Puk Palik Lake Junior**, Southwest Area Forestry, DOF. Started on FWS land 54 miles northwest of Bethel, AK. Short grass. Minimal fire behavior. Last report unless significant activity occurs.

Northwest Area (PL 4)

New fires: 19
New large incidents: 4
Uncontained large fires: 9
NIMOs committed: 1
Type 1 IMTs committed: 1
Type 2 IMTs committed: 5

Corner Creek, Ochoco NF. ODF IMT1 (Buckman). IMT is also managing the Sugar Loaf fire. Eleven miles south of Dayville, OR. Timber, brush and short grass. Active fire behavior with running and torching. Structures threatened. Road closures in effect.

Sugar Loaf, Prineville District, BLM. Nine miles north of Dayville, OR. Timber and short grass. Minimal fire behavior with creeping and smoldering. Structures threatened.

Twenty-One Mile Grade, Colville Agency, BIA. IMT2 (Leitch). Twenty-one miles south of Republic, WA. Timber and light logging slash. Active fire behavior with uphill runs, group torching and short-range spotting. Structures threatened. Evacuations, road and area closures in effect.

Sleepy Hollow, Southeast Region, DNR. IMT2 (Rabe). One mile northwest of Monitor, WA. Short grass. Minimal fire behavior. Structures threatened. Road closures in effect.

Paradise, Olympic NP. NIMO (Hahnenberg). Thirteen miles north of Quinault, WA. Timber. Active fire behavior with uphill runs, creeping and backing. Area and trail closures in effect.

Bunker Hill Complex, Umpqua NF. Transfer of command from IMT2 (Fillis) back to the local unit occurred yesterday. Eleven miles north of Diamond Lake, OR. Timber. Minimal fire behavior. Road, area and trail closures in effect. Reduction in acreage due to more accurate mapping.

* **231**, Northeast Region, DNR. IMT2 (Ciraulo). Seven miles south of Springdale, WA. Timber. Active fire behavior with torching, backing and smoldering. Structures threatened. Evacuations in effect.

* **Horseshoe**, Gifford Pinchot NF. IMT2 (Gales). Fifteen miles northwest of Trout Lake, WA. Timber. Moderate fire behavior with group torching and short-range spotting.

Jones Canyon, John Day Unit, ODF. Started on BLM land 13 miles northeast of Monument, OR. Brush. Minimal fire behavior.

* **Williams**, Northeast Region, DNR. Three miles north of Colville, WA. Timber. Active fire behavior. Numerous structures threatened.

* **Junction**, Washington State Fire Marshal's Office. Fifteen miles south of Goldendale, WA. Short grass and brush. Moderate fire behavior with uphill runs. Structures threatened. Last report unless significant activity occurs.

Buckskin, Rogue River-Siskiyou NF. Ten miles southwest of Cave Junction, OR. Closed timber litter and brush. No new information. Last report unless new information is received.

Predictive Services Discussion High pressure over the West will continue to weaken as a trough moves along the Canadian border into the northern part of the U.S. Showers and thunderstorms will continue over most of southern and central Rockies, the Great Basin, the Sierras and parts of southern Oregon. Rain and thunderstorms will also develop over the northern Rockies and the northern Plains as a strong cold front pushes southward. Scattered rain and thunderstorms will also cover most of the southeastern U.S. Temperatures over the West will begin to drop slowly as the high pressure. The southwest deserts will remain quite hot and dry. Temperatures in the northern Rockies and northern Plains will fall to autumn like levels while the warmer temperatures spread into the central Plains and Midwest. The Appalachians and New England will remain mild.

In Alaska, high pressure will strengthen over the state, increasing temperatures and accelerating drying through the Interior. Scattered showers and thunderstorms will develop over the Southwest.

Margin: a Trigger for Sensemaking¹

“We are in a universe from which we cannot exclude risk, uncertainty, and disorder. We have to live and deal with disorder.” – Morin, 2008

Our environment is complex and dynamic, realistically this means there are a lot of conditions to pay attention to and those conditions are constantly changing. Conditions like RH, crew dynamics, blood sugar, where you are, where the fire is, budgets...you get the idea. The tricky part is that risk changes as conditions change, but all those conditions change at different rates and mean different things depending on the context. An RH that moves from 45-40 is different than one that moves from 20-15. A fire that moves a half-mile in an hour, but is 10 miles from your position is different from one that does the same and is a half-mile from you. Traditionally this is the role of trigger points. Set a trigger point and when the indicator reaches the preset value, reassess or take some preset action. Trigger points are intended to move us out of “auto pilot” and into a more deliberate way of thinking.

What about the stuff that can't be predicted or measured? In our complex environment it is often the interaction of multiple, seeming unrelated, conditions that align and affect risk. This is the gap that margin was developed to fill.

- Take a moment to share a *short*² story about a time when lots of seemingly unrelated things were aligning to increase risk.
 - a. Could you assign trigger points to all these conditions, and even if you could would it be helpful to set so many?
 - b. How does it change if we use a change in margin as a trigger point for reassessment and deliberate thinking?

We are not suggesting that we do away with traditional trigger points; rather we suggest it is important to think of, and talk about, the environment as a whole. By giving “language to that uneasy feeling,” margin provides a way of thinking and talking about all the thousands of conditions that exist and interact in our environment without having to name each one. In this way, a change in margin can itself be a trigger point for reassessment and deliberate sensemaking.

“It gives language to that uneasy feeling when the environment is changing, but you can't quite put your finger on exactly what is changing.”
