Predictive Services Discussion: A broad trough will stretch across the Northwest and northern Rockies while high pressure builds over the far southwestern U.S. Breezy conditions will continue over the northern Rockies and spread into the Plains and Great Lakes region. Scattered showers and thunderstorms will form along a front from the Upper Midwest to the Texas Panhandle. Scattered thunderstorms will also form over the southern and central Rockies and along most of the Gulf Coast. Temperatures will continue very hot in the far Southwest and California. Very warm weather will remain over most of the East. Mild conditions will continue over northern Rockies and the northern Plains. Scattered showers will spread through most of the state. Temperatures will be warm in the eastern Interior, mild elsewhere.

# Developing a Learning Organization 

Leadership Category

Leaders evaluate performance at all levels to understand the causal factors of successes and failures. All those involved learn incrementally, applying today's lessons to the next assignment. This focus on continuous improvement brings with it a responsibility to share lessons learned throughout the organization.

In a learning organization, leaders treat honest mistakes as opportunities to learn and do better next time. Understanding that failure is a part of learning, they establish command climates in which followers are motivated by desire to succeed rather than fear of failure. At the crew level, conducting regular After Action Reviews is one of the most powerful tools a leader has for building effective and cohesive teams.

## Discussion Points

- Discuss the relationship between developing a learning organization and safety.
- What happens when honest mistakes are punished rather than used as a learning opportunity?
- How are mistakes and failure dealt with within your crew / organization?
- What was your crew's / organization's most recent learning moment?
