Predictive Services Discussion: A cold front sweeping across the Rockies will keep breezy to windy conditions across much of the Great Basin and parts of the northern and central Rockies. Isolated showers will develop over western and central Montana. Hot and dry conditions will continue over California and the desert Southwest. Scattered thunderstorms and heavy rain will form ahead of the Front across the northern Plains to the Great Lakes. Scattered afternoon thunderstorms will dot the eastern U.S.

# NO COMMUNICATION LINK WITH CREW MEMBERS, SUPERVISORS \& ADJOINING FORCES 

Fire Communication Category

Watchout Situation \#7 is a danger that must be mitigated by maintaining good communications while working on fires. Firefighters must constantly ask themselves the following questions as situations change on the fireline:

- Can communications be established?
- Talk about how communications are set up on fires.
- Review situations where communications were a problem and what was done to fix the problem.
- Do you need a repeater setup or can an experienced firefighter act as a human repeater?
- Is the communication triangle complete?
- Review the communication triangle and where it comes up in the "10 Standard Fire Orders" and the "18 Watchout Situations."
- Discuss ways that firefighters can maintain the communication triangle on the fireline.
- Reduce the risks
- If the situation is complex, wait until communications are in place.
- Talk about the fires where crews had to leave the line, didn't go out on the line, or something negative happened because communications were inadequate. Discuss what was done to establish communications.
