Predictive Services Discussion: An upper ridge will continue to build over the western U.S., warming temperatures quickly across the region. Isolated thunderstorms may develop over portions of the West tonight including the Columbia Basin and California. Scattered thunderstorms will spread through the southern Rockies and into parts of the southern Great Basin. A cold front will push into the eastern U.S. with scattered showers and thunderstorms forming over the Gulf states and along the eastern seaboard. Temperatures will remain very warm and humid from Texas to Virginia with falllike conditions across the Great Lakes and the Midwest.

# SAFECOMs 

Aviation Category

## What the SAFECOM system IS

The Aviation Safety Communiqué (SAFECOM) AMD-34/FS-5700-14 should be used to report any condition, observation, act, maintenance problem, or circumstance with personnel or the aircraft that has the potential to cause an aviation-related mishap. SAFECOMS are a tool used to identify, document, track, and correct safety related issues.

## What the SAFECOM system IS NOT

- NOT intended for initiating punitive actions,
- NOT to be used as a complaint system or for personal attacks,
- NOT used by contracting officers for contract evaluations/award purposes,
- NOT a substitute for "on-the-spot" corrections to a safety concern,
- Does NOT replace the requirement for initiating an accident or incident report.

## SAFECOMs provide the necessary feedback for development of the following communication tools:
