Predictive Services Discussion: High pressure will dominate the weather pattern over the western United States today for generally warm, dry and unstable conditions. Heavy smoke will bring hazy skies and poor visibility to the northwestern states. Midlevel moisture circulating beneath the upper ridge will produce scattered rain showers across the southwest, Colorado and into much of the eastern Great Basin with the possibility of isolated coverage as far north as eastern Idaho and central Montana. Thunderstorms and wetting rain will also form in the Great Plains region as a shortwave moves around the high pressure. Conditions over the eastern United States will continue to be cooler than normal with mostly clear skies except in the far Southeast where heavy rain continues and also over the Hawaiian Islands where widespread precipitation also persists. Puerto Rico will begin to see significant widespread precipitation this evening as a result of Tropical Storm Erika approaching from the east.

## Fatigue/Stress

Firefighter Health \& First Aid

Accumulated (Chronic) Fatigue is defined as fatigue from which normal rest does not produce recovery. Accumulated fatigue is often caused by extended periods of stress with inadequate recovery periods, which results in decreased productivity, compromised immune function, and reduced alertness. Fatigued workers perform poorly, behave carelessly, tolerate greater errors and become inattentive. Chronic fatigue often results in increased stress, which may present itself through certain behavioral and physiological indicators, such as those described below:

- Behavioral indicators
- Decreased motivation and low morale
- Increased irritability and depression
- Physiological indicators
- Confused, poor problem solving
- Poor abstract thinking
- poor attention/decisions
- poor concentration/memory
- extreme emotional responses
- social/behavioral changes
- Recommendations for chronic fatigue/stress are:
- Take longer periods of rest/recovery
- Ensure that workers are adequately rested before they begin work shifts
- Provide periodic rest breaks to allow physical and mental recovery
- Alternate between heavy and light tasks
- Eat well-balanced meals regularly, with energy supplements during periods of high exertion
- Maintain hydration
- Ensure workers maintain good personal hygiene
- Maintain high standards of physical fitness and work capacity
- In extreme cases, personnel may need to be relieved of their duties
