Predictive Services Discussion: Widespread wetting precipitation is expected over the northwest U.S. as a cold, upper level low pressure trough digs into central Idaho. Over half an inch of rain is expected across the region as it spreads east toward the northern Rockies and Plains. Several inches of snowfall are anticipated in the mountains as well. Further south much drier conditions will prevail over California and Nevada, as strong winds round the base of the trough. Flash flooding may result over the Four Corners region as tropical moisture pushes into the region. East of the Rockies, high pressure will dominate the weather with warm conditions persisting. Showers and thunderstorms will focus over the Dakotas along a cold front, while the Tennessee Valley will see showers in conjunction with an area of low pressure aloft. Afternoon storms are also expected to develop over Florida.

## AVIATION MISHAP RESPONSE

Aviation Category

Having a written mishap response action posted and accessible to all employees is an important first step. Having a list of actions to follow will ensure that nothing is missed in a stressful, time-critical period. Response plans have to be briefed to all on the crew.

- Immediate, positive action is necessary. Any delay may affect someone's chances of survival.
- Conduct rescue operations keeping the following priorities in mind:
- Preserve life. Rescuers first!!!
- Do whatever is necessary to extricate injured occupants and to extinguish fires, keeping in mind the necessity of protecting and preserving evidence.
- Document and/or photograph the location of any debris that must be disturbed in order to carry out rescues and/or fire suppression activities.
- Secure the area. Treat the crash site as a crime scene. Arrange for security at the accident scene if necessary. Determine if hazardous materials were on the aircraft. Deny access except to credentialed officials and escorted media.
* Be aware that crash sites can be dangerous due to hazardous cargo, flammable and toxic fluids, sharp objects, disease, adverse terrain, hot/cold weather conditions, and fire.
- Exercise good judgment, utilize available protective devices and clothing, and use extreme caution when working near the wreckage site.
* Do not exceed your physical limitations.
- Activity: Review your unit's mishap response plan with the crew. Consider practicing with a crash rescue drill or scenario.
