

**National Interagency Coordination Center
Incident Management Situation Report
Thursday, October 1, 2015 - 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity: Light (43 new fires)
 New large incidents: 0
 Large fires contained: 0
 Uncontained large fires: ** 4
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 0
 Type 2 IMTs committed: 1

** Uncontained large fires include only fires being managed under a full suppression strategy.

Southern California Area (PL 3)

New fires: 6
 New large incidents: 0
 Uncontained large fires: 1

Rough, Sierra NF. Five miles north of Hume, CA. Timber, chaparral and tall grass. Active fire behavior with isolated torching, backing and creeping. Road, area and trail closures in effect.

Incident Name	Unit	Size		%	Ctn / Comp	Est	Personnel			Resources			Strc Lost	\$\$ CTD	Origin Own
		Acres	Chge				Total	Chge	Crews	Eng	Heli				
Rough	CA-SNF	151,623	0	87	Ctn	NR	387	43	8	15	4	4	119.8M	FS	

Rocky Mountain Area (PL 1)

New fires: 3
 New large incidents: 0
 Uncontained large fires: 2
 Type 2 IMTs committed: 1

Crooked Creek, Shoshone NF. IMT 2 (Greer). Twelve miles northwest of Dubois, WY. Timber. Active fire behavior. Structures threatened. Road closures in effect. Reduction in acreage due to more accurate mapping.

Smith Mountain, Rawlins Field Office, BLM. Forty miles southeast of Casper, WY. Timber. Minimal fire behavior with creeping and smoldering. Structures threatened.

Incident Name	Unit	Size		%	Ctn / Comp	Est	Personnel		Resources			Strc Lost	\$\$ CTD	Origin Own

*** Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments. ***

Additional wildfire information is available through the Geographic Areas at <http://gacc.nifc.gov/>

Predictive Services Discussion: A ridge of high pressure over the central Rockies will be anchored by troughs of low pressure on both Coasts today. One trough of low pressure over the Great Basin and northern Rockies will bring scattered showers and thunderstorms to the region along with cooler temperatures. Another trough will deepen over the Tennessee Valley, with widespread showers and thunderstorms stretching from the Mid-Atlantic through the northeast U.S. Dry and breezy conditions will develop upstream from the central Plains through the Gulf Coast.

UNBURNED FUEL BETWEEN YOU AND THE FIRE

Operational Engagement Category

It is important for firefighters to recognize unburned fuel between themselves and the fire as Watchout Situation #11. Often it is not possible or practical for direct attack on a fire. Before attempting indirect attack and any time the firefighter is in a position where there is unburned fuel between them and the fire, the following questions must be addressed immediately:

- Can you see the fire or are you in contact with someone who can? Discuss situations you might find yourself in where you are out in the green and cannot see the fire. What can you do?
- Is fire spread in a direction away from you? Do you consider the potential for fire spread? Are you safe if the wind switches?
- Will your position be defensible when the fire reaches you? Talk about what must be taken into account when building indirect line or approaching a fire through the green.
- Is your line anchored? Discuss how you anchor indirect line.
- Are your escape routes and safety zones adequate? What is adequate?
- Are weather indicators constantly changing?
- To reduce the risks:
 - Post lookouts
 - Consider a different location. Review situations where you constructed indirect line or approached a fire through the green and how you provided for your safety.
