National Interagency Coordination Center Incident Management Situation Report Friday, October 23, 2015 – 0800 MT National Preparedness Level 1

National Fire Activity (Oct. 16 – Oct. 22)

Initial activity:	Light (788 new fires)
New large incidents:	17
Large fires contained:	15
Uncontained large fires:**	7
Area Command Teams Committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	0
**Uncontained large fires include only fire	s being managed under a full suppression strategy.
Link to Geographic Area daily reports.	

<u>Southern Area (PL 3)</u>	
New fires:	579
New large incidents:	13
Uncontained large fires:	6
Type 1 IMTs committed:	1

Hidden Pines, Texas A & M Forest Service. IMT 1 (Wilkins). Started on private land four miles north of Smithville, TX. Timber and tall grass. Minimal fire behavior with smoldering. Structures threatened. Trail closures in effect.

* **Stanford Creek**, Mississippi Forestry Commission. Started on private land seven miles southwest of Lumberton, MS. Timber and tall grass. Active fire behavior with running, spotting and torching.

* **Big Tree**, National Forests in Alabama. Six miles southwest of Youngtown, AL. Hardwood litter. Moderate fire behavior with uphill runs, flanking and backing. Last report unless significant activity occurs.

* **Biloxi Creek**, Mississippi Forestry Commission. Started on Private land 11 miles southwest of McHenry, MS. Timber. Active fire behavior with running, torching and spotting.

* **Range 14**, National Forests in Mississippi. Five miles east of Brooklyn, MS. Southern rough and tall grass. Active fire behavior with backing and creeping. Last report unless significant activity occurs.

* **30 Giveaway**, Mississippi Forestry Commission . Started on private land eight miles east of Poplarville, MS. Timber and light logging slash. Active fire behavior with running, torching and spotting.

Whitley, Texas A & M Forest Service. Started on private land seven miles southwest of Brownwood, TX. Tall grass and oak. No new information. Last report unless new information is received .

Tank Battery, Texas A & M Forest Service. Started on private land 11 miles southwest of Jacksonville, TX. Timber. No new information. Last report unless new information is received .

Additional wildfire information is available through the Geographic Areas at http://gacc.nifc.gov/

Predictive Services Discussion: A complex pattern of progressive weather systems will unfold in the next several days. A cold front will move through the eastern U.S. today with showers and thunderstorms stretching from the Mississippi Valley through the southern Plains region this weekend. Flash flooding may result over the south Central U.S. in association with a deep fetch of moist and unstable air. Very moist conditions will persist through the week for the eastern half of the Nation as the remnants of Hurricane Patricia move northeastward from the Gulf of Mexico before interacting with a Great Lakes low. In the west, high pressure with warm and dry conditions will give way to a weak upper level trough of low pressure which will bring a weather system into the Pacific Northwest late this weekend and early next week. Meanwhile, a strong Pacific storm system from the remnants of Hurricane Olaf will impact California and the southwest U.S. the latter part of the week with generous precipitation spreading toward the Rockies through the end of the period.

Leadership Environment

Leadership Category

Leadership is defined as the act of influencing people in order to achieve a result. The leadership environment is made up of critical elements that a successful leader must consider in planning for effective action. Those critical elements are:

- YOU the leader, who is ultimately responsible for all action and results.
- YOUR PEOPLE those that you are responsible for.
- SITUATION comprised of the many unique variables that influence a leader's decision such as objectives, conditions, resources available, organizational influences, and others affected by the action.
- CONSEQUENCES the short and long-term effects of your actions.

Leaders constantly assess the elements of the leadership environment and adapt accordingly. Successful leaders understand the interplay of these variables and demonstrate flexibility in selecting appropriate leadership tools and techniques as a situation changes.

Discussion Points

- Each mission has a different level risk. Discuss how the 4 leadership environment elements affect perceived risk in a changing environment.
- Each situation is unique and changes over time. Discuss what changes you might predict in your environment today.
- Discuss what leadership tools might be appropriate for those predicted changes today.
