^{***} Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments. ***

Additional wildfire information is available through the Geographic Areas at http://gacc.nifc.gov/

Predictive Services Discussion: A cold front associated with an upper level disturbance will track eastward from the upper Mississippi Valley through the Great Lakes region this weekend. This will produce the first widespread snowfall across the northeast U.S. In the western U.S. high pressure will build with Gusty offshore winds this weekend in southern California. Early next week a transition to cooler and wet winter conditions will develop over the Intermountain West as a strong Pacific storm system moves from the Pacific Northwest Tuesday through the Great Basin and Rockies during the Thanksgiving Holiday. Further south it will be dry and breezy across the southwest U.S. on the southern periphery of the upper level low pressure system. By late next week the remnants of Tropical Storm Rick will bring showers and thunderstorms to the southern Plains and Mississippi Valley while the Atlantic coastal regions will be cool and dry under a ridge of high pressure aloft.

MY SAFETY

Leadership Category

An important aspect of safety is individual responsibility for one's own health & safety. Even with the best supervision, each individual firefighter will occasionally be required to make personal decisions concerning their safety. It is important that individual responsibility be taught as the basis for a viable safety program. Some of those individual responsibilities are:

- Fitness for duty. Begin each work shift both mentally and physically prepared for the rigors of wildland firefighting. Getting adequate sleep, maintaining a healthy diet, and proactively participating in physical training are the foundation of "My Safety".
- Utilization of personal protective equipment. Wear your PPE without being told. Each individual is responsible for performing their own risk assessments. If a hazard is identified that can be mitigated by wearing a particular PPE component it should be utilized. Fireline supervisors have more important duties to focus on other than performing glove patrol.
- Following safe work practices. Using a spotter when backing up vehicles is the prudent and professional course of action. If you are unsure of how to perform a job task safely, ask your supervisor or experienced coworker.
- Using the correct reference materials is an important aspect of safety. You should have a working knowledge of the Red Book, IRPG, and your local operating guidelines.
- Ensure instructions are clearly understood. Communication is a basic responsibility for all fire personnel. Ask appropriate questions to clarify uncertain issues. Speak up when you observe hazards that may place yourself or others at risk.
- Maintain situational awareness at all times. Awareness is a vital component of "My Safety". Pay attention to what is happening around your area of operations. Always display an awareness of what is happening around you by asking questions or making comments.

Summary: Do not expect someone else to be responsible for your safety. Take it upon yourself to make "My Safety" your number one priority.

Discussions points:

- 1. Talk about ways you can improve on your safety.
- 2. Have your supervisor talk about their expectations for individual safety.
