# National Interagency Coordination Center Incident Management Situation Report <br> Friday, April 8, 2016 - 0800 MT <br> National Preparedness Level 1 

National Fire Activity (Apr. 1 - Apr. 7)
Initial attack activity:
Light (677 new fires)
New large incidents: 35
Large fires contained: 32
Uncontained large fires:** 11
Area Command Teams Committed: 0
NIMOs committed: 0
Type 1 IMTs committed: 0
Type 2 IMTs committed: 1
**Uncontained large fires include only fires being managed under a full suppression strategy.
Link to Geographic Area daily reports.

## Southern Area (PL 3)

New fires:
New large incidents:
Uncontained large fires:7

Type 2 IMTs committed: 1

* 350 Complex, Oklahoma DOF. Texas IMT 2 (Rogers). Six miles north of Woodward, OK. Tall grass, brush and timber. Active fire behavior with wind driven runs, running and group torching. Numerous structures threatened. Evacuations in effect.
* Halls Top, Cherokee NF. Started on private land 10 miles southeast of Newport, TN. Timber and hardwood litter. Creeping and smoldering with spotting. Residences threatened. Precipitation occurred over the fire area.
* Top Hat, Osage Agency, BIA. Two miles south of Hominy, OK. Hardwood litter. Minimal fire behavior. Structures threatened.
* Freedom Hills, Okmulgee Field Office, BIA. Nine miles northeast of Kellyville, OK. Tall grass. Minimal fire behavior. Structures threatened.
* Still Road, Florida Forest Service. Three miles northeast of Barberville, FL. Southern rough. Moderate fire behavior. Residences threatened.
* Johnson, Okmulgee Field Office, BIA. Four miles southeast of Horntown, OK. Hardwood litter and timber. Minimal fire behavior.

Sciota Road, Cherokee NF. Started on private land five miles southeast of Unicoi, TN. Light logging slash, hardwood litter and timber. Minimal fire behavior.

* Dry Creek, Buffalo National River, NPS. Twenty five miles south of Harrison, AR. Hardwood litter. Minimal fire behavior with backing. Structures threatened. Trail closures in effect. Last report unless significant occurs.

*** Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments. ***
Additional wildfire information is available through the Geographic Areas at http://gacc.nifc.gov/

Predictive Services Discussion: A series of troughs will undercut the western North American ridge while a trough in the East gradually moves east and allows warmer conditions to return. The first trough will move through the southwestern U.S. over the weekend bringing scattered showers and thunderstorms to the region. Some snow in higher elevations is likely. Meanwhile, cool weather in the East will gradually turn warmer as systems moving into the central U.S. draw warmer Gulf air northward. A cold front will bring another round of thunderstorms to the Plains and East by mid to late week as another trough moves into the West. Widespread rain and snow will cross most of the Intermountain region by week's end.

## RESPONDING TO VEHICLE FIRES <br> Vehicles/Roads Category

Suppression of vehicle fires is extremely dangerous and poses many health and safety hazards to firefighters. The following procedures are recommended:

- Wear a high visibility reflective vest or other high visibility clothing if available.
- Secure the scene and provide or request assistance for traffic control.
- Park your vehicle to provide a protective barricade for you and your crew. Position it so that an inattentive or drunk driver will hit your vehicle and not your crew. Your vehicle is expendable, you are not.
- Provide for your escape route at the scene.
- Do not use road flares if fuel is leaking from the vehicle.
- DO NOT BREATHE ANY SMOKE. Smoke from vehicle fires contains toxic chemicals that will kill you.
- Vehicle fires are considered a hazardous materials scene. Suppression action should only be taken if the crew is trained, equipped, and authorized in the use of Self-Contained Breathing Apparatus (SCBA).
- If taking suppression action on wildland fuels, firefighters should ensure that they are a safe distance from the burning vehicle (100-feet minimum), and avoid contact with vehicle fire smoke or fumes.
