

**National Interagency Coordination Center
Incident Management Situation Report
Friday, April 15, 2016 – 0800 MT
National Preparedness Level 1**

National Fire Activity (Apr. 8 – Apr. 14)

Initial attack activity:	Light (729 new fires)
New large incidents:	17
Large fires contained:	20
Uncontained large fires:**	6
Area Command Teams Committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0

**Uncontained large fires include only fires being managed under a full suppression strategy.
[Link](#) to Geographic Area daily reports.

Southern Area (PL 2)

New fires:	472
New large incidents:	15
Uncontained large fires:	5

* **Long Pine Key**, Everglades NP. Twelve miles southwest of Homestead, FL. Timber and brush. Moderate fire behavior. Structures threatened

350 Complex, Oklahoma DOF. Six miles north of Woodward, OK. Tall grass, brush and timber. Minimal fire behavior. Structures threatened.

Top Hat, Osage Agency, BIA. Two miles south of Hominy, OK. Hardwood litter. Minimal fire behavior. Last report unless significant activity occurs.

Still Road, Florida Forest Service. Three miles northeast of Barberville, FL. Southern rough. Minimal fire behavior. Last report unless significant activity occurs.

* **Relay**, Florida Forest Service. Seven miles southwest of Favoretta, FL. Southern rough. Minimal fire behavior.

*** Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments. ***

Additional wildfire information is available through the Geographic Areas at <http://gacc.nifc.gov/>

Predictive Services Discussion: A slow moving trough will move into the Interior West over the weekend while a strong ridge builds over the eastern U.S. The western trough will linger over the Rockies as a closed low through midweek before opening up and allowing a ridge to setup in the West. Scattered showers and thunderstorms, with snow at higher elevations, will develop over the northwestern corner of the nation before moving into the Plains early in the week. Warm and dry weather will persist over the East. Late in the week, warmer and drier conditions will set up in the West as scattered showers and thunderstorms move into the East. Heavy rain is possible across parts of the south central and southeastern U.S. by the end of the week.

Burn Protocols

Firefighter Health & First Aid

Burn injuries are often difficult to diagnose and may continue to worsen if they do not receive immediate, specialized treatment. The initial evaluation and treatment of these burns often happens in rural medical facilities with limited experience in burn injury care. In the past, this has resulted in evaluation and treatment that did not provide the best care to injured firefighters. Therefore, victims with either severe burns or burns that meet any of the below criteria should be immediately referred and transported to a regional burn center.

- Burn injury criteria identified by the American Burn Association as warranting immediate referral to an accredited burn center.
 - Partial thickness burns (second degree) involving greater than 5% Total Body Surface Area.
 - Burns involving the face, hands, feet, genitalia, perineum, or major joints.
 - Third-degree burns of any size are present.
 - Electrical burns, including lightning injury are present.
 - Inhalation injury is suspected.
 - Burns are accompanied by traumatic injury (such as fractures).
 - Individuals are unable to immediately return to full duty.

- It is imperative that action is expeditious, as burn injuries are often difficult to evaluate and may take 72 hours to manifest themselves. When there is any doubt as to the severity of the injury, the required action is to immediately refer and transport the employee to a regional burn center.

- To ensure that Workers Compensation assistance is provided an agency administrator, or designee, for the incident needs to coordinate with the firefighter's home unit.

- Do you know the location of the closest regional burn center?
 - <http://www.blm.gov/nifc/st/en/prog/fire/im.html>
