# National Interagency Coordination Center <br> Incident Management Situation Report <br> Thursday, June 9, 2016 - 0530 MT <br> National Preparedness Level 2 

National Fire Activity
Initial attack activity:
New large incidents:
Large fires contained:

## Light (92 new fires)

Uncontained large fires:** 126

Area Command Teams Committed: 0
NIMOs committed: 0
Type 1 IMTs committed: 2
Type 2 IMTs committed:2

3
**Uncontained large fires include only fires being managed under a full suppression strategy.
Link to Geographic Area daily reports.

## Southwest Area (PL 3)

New fires: 12
New large incidents: 2
Uncontained large fires: 2
Type 2 IMTs committed: 2

* Tenderfoot, Phoenix District, BLM. IMT 2 (Sinclair). One mile south of Yarnell, AZ. Brush and tall grass. Extreme fire behavior with running and spotting. Community of Yarnell threatened. Evacuations, road and area closures in effect.

Juniper, Tonto NF. IMT 2 (Bales). Ten miles south of Young, AZ. Timber and chaparral. Active fire behavior with wind driven runs, spotting and flanking. Structures threatened. Area closures in effect.

* 38E, Arizona State Forestry, DOF. Eight miles NE of Wellton, AZ. Chaparral. Active fire behavior with running, torching and spotting. Structures threatened. Evacuations and road closures in effect.

North, Cibola NF. Twenty-five miles southwest of Magdalena, NM. Timber. Moderate fire behavior with flanking, backing and creeping. Structures threatened. Road, trail and area closures in effect. Last report unless significant activity occurs.

Predictive Services Discussion: A strong ridge that brought high temperatures to the West will move into the Plains states. A broad trough in the East will move offshore as another trough enters the western U.S. Scattered showers and thunderstorms will develop over the Northwest and the Rockies as a cold front sweeps through the Interior West. Scattered thunderstorms will also form over the Upper Mississippi and along the Gulf Coast. Temperatures in much of the West will be cooler while the Plains get much warmer. Cool conditions will remain in the Northeast. In Alaska, scattered thunderstorms will increase across the Southwest while isolated afternoon thunderstorms form over the Interior. Temperatures will be warm in the Interior and mild elsewhere.

Accumulated (Chronic) Fatigue is defined as fatigue from which normal rest does not produce recovery. Accumulated fatigue is often caused by extended periods of stress with inadequate recovery periods, which results in decreased productivity, compromised immune function, and reduced alertness. Fatigued workers perform poorly, behave carelessly, tolerate greater errors and become inattentive. Chronic fatigue often results in increased stress, which may present itself through certain behavioral and physiological indicators, such as those described below:

- Behavioral indicators
- Decreased motivation and low morale
- Increased irritability and depression
- Physiological indicators
- Confused, poor problem solving
- Poor abstract thinking
- poor attention/decisions
- poor concentration/memory
- extreme emotional responses
- social/behavioral changes
- Recommendations for chronic fatigue/stress are:
- Take longer periods of rest/recovery
- Ensure that workers are adequately rested before they begin work shifts
- Provide periodic rest breaks to allow physical and mental recovery
- Alternate between heavy and light tasks
- Eat well-balanced meals regularly, with energy supplements during periods of high exertion
- Maintain hydration
- Ensure workers maintain good personal hygiene
- Maintain high standards of physical fitness and work capacity
- In extreme cases, personnel may need to be relieved of their duties
