# National Interagency Coordination Center <br> Incident Management Situation Report <br> Friday, June 24, 2016 - 0530 MT <br> National Preparedness Level 2 

National Fire Activity
Initial attack activity:
New large incidents:
Large fires contained:
Uncontained large fires:**
Area Command Teams Committed:
NIMOs committed:
Type 1 IMTs committed:
Type 2 IMTs committed:
**Uncontained large fires include only fires being managed under a full suppression strategy.
Link to Geographic Area daily reports.

## Southwest Area (PL 4)

New fires: 42
New large incidents: 1
Uncontained large fires: 5
Type 1 IMTs committed: 2
Type 2 IMTs committed: 1
Cedar, Fort Apache Agency, BIA. IMT 1 (Pierson). Ten miles south of Show Low, AZ. Timber and brush. Moderate fire behavior with isolated torching, flanking, and backing. Numerous structures threatened. Evacuations and road closures in effect.

Sage-TCA, Truxton Canyon Agency, BIA. Twenty-eight miles northeast of Peach Springs, AZ. Timber, brush and short grass. Active fire behavior with torching and short-range spotting. Road closures in effect.

Dog Head, Cibola NF. Transfer of command from IMT 1 (Day) back to the local unit will occur tomorrow. Six miles northwest of Tajique, NM. Timber and medium logging slash. Minimal fire behavior. Road, area and trail closures in effect. Precipitation occurred over the fire area yesterday.

Brown, Southeast District, Arizona State Forestry. Fifty miles southwest of Tucson, AZ. Chaparral and tall grass. Active fire behavior with backing. Last report unless significant activity occurs.

Predictive Services Discussion: A wet low pressure system will move east across the Pacific Northwest and Northern Rockies, bringing widespread precipitation to Washington, northern Idaho, and western Montana. This should provide a needed boost to fuel moisture levels. Windy conditions will develop along the southern fringes of this system impacting southern portions of the Pacific Northwest, Northern Rockies, and Wyoming. Ahead of the system, strong to severe thunderstorms are possible across the Northern Plains along the Canadian Border. In the Southwest, slight "cooling" is expected as the ridge of high pressure further weakens. Isolated storms will be possible across eastern Arizona, New Mexico, Colorado, and Wyoming. East of the Mississippi River, a redeveloping cold front will create a slight chance for severe thunderstorms across the eastern portion of the Central Plains and Tennessee River Valley. In Alaska expect more of the same. High pressure will move from eastern Alaska into the Yukon Territory, producing a dry day for the Interior while a strong, wet system will move east from the Bering Sea into southwest Alaska, bringing widespread wetting rainfall.

After Action Review part 1<br>Fire Communication Category

## How to conduct an effective AAR

An AAR is a professional discussion of an event with the objective to identify successes and failures. It is a tool that leaders, teams, crews and units can use to get maximum benefit from every incident or project. It is essential for wildland firefighters to learn from our mistakes and to capitalize on our successes. It is considered a valuable tool in high-risk professions where the smallest mistakes can lead to disastrous results. FYI - an AAR is not a critique and not a forum to assign blame. It's an open, honest and professional discussion for purposes of improvement.

Once you (the leader/facilitator) have demonstrated that the AAR works and that it will be part of your team's Standard Operating Procedures, the discussion will become more open. Finding out what they did is not nearly as important as why they did it. Good active listening skills are essential. Do not immediately try to solve or correct the issue, but let it play out. Try to get to the root of the issue. The leader must be a part of the AAR and will have to accept criticism. This is important because the team will be looking for affirmation of the AAR process.

- Have the AAR as soon after an event as possible with all the personnel involved if at all possible.
- The leader's role is to insure there is skilled facilitation of the AAR.
- Make sure everyone participates.
- Pay attention to time.
- Establish clear ground rules: encourage candor and openness, all participants have equal ownership, focus on improving performance, and keep all discussions confidential.
- End on a positive note.

## 1. What was planned?

Review the intent of the mission Desired "End State" (what does "Right" look like).

## 2. What actually happened?

Establish the facts
Pool multiple perspectives to build a shared picture of what happened.

## 3. Why did it happen?

Analysis of cause and effect
Focus on WHAT not WHO.
Provide progressive refinement for drawing out explanations of what occurred.

## 4. What are we going to do next time?

Correct Weaknesses
Focus on items you can fix, rather than external forces outside of your control.

References:The Wildland Fire Leadership Development Program website has multiple additional references on conducting effective AARs, many designed specifically for wildland firefighters and leaders.

[^0]:    * Maple, Apache-Sitgreaves NF. Twenty-one miles northeast of Clifton, AZ. Timber and brush. Moderate fire behavior with backing, flanking and smoldering. Last report unless significant activity occurs.

    Burro, Apache-Sitgreaves NF. Twelve miles northwest of Mule Creek, NM. Brush and tall grass. Minimal fire behavior.

    Wildcat, Kaibab NF. Transfer of command from IMT 2 (Bales) back to the local unit occurred yesterday. Twenty-six miles southeast of Jacob Lake, AZ. Chaparral and short grass.

    Bert, Kaibab NF. Previously reported incident. Ten miles southeast of Valle, AZ. Hardwood slash, dormant brush, and short grass. Minimal fire behavior with smoldering. Last report unless significant activity occurs.
