# National Interagency Coordination Center Incident Management Situation Report Wednesday, July 13, 2016 - 0530 MT National Preparedness Level 2 

## National Fire Activity

Initial attack activity:
New large incidents:
Large fires contained:
Uncontained large fires:**
Area Command Teams Committed:
NIMOs committed:
Type 1 IMTs committed:
Type 2 IMTs committed:
**Uncontained large fires include only fires being managed under a full suppression strategy.
Link to Geographic Area daily reports.

## Rocky Mountain (PL 3)

New fires:

## 11

New large incidents:
Uncontained large fires:
Type 2 IMTs Committed:
Hayden Pass, Pike \& San Isabel NF. IMT 2 (Esperance). Twenty miles southeast of Salida, CO. Timber, heavy logging slash and chaparral. Active fire behavior with group torching and short crown runs. Numerous structures threatened. Evacuations, road, area and trail closures in effect.

Cold Springs, Boulder County. IMT 2 (Greer). Two miles northeast of Nederland, CO. Timber. Minimal fire behavior. Numerous residences threatened. Evacuations, road, area and trail closures in effect. Reduction in acreage due to more accurate mapping.

* Hairy, Fort Carson Army Base. Twenty-one miles southwest of Colorado Springs, CO. Hardwood slash, brush, and tall grass. Active fire behavior with single-tree torching, spotting and creeping. Structures threatened. Evacuations and area closures in effect.

Beaver Creek, Routt NF. Twenty-four miles northwest of Walden, CO. Timber and brush. Active fire behavior with short crown runs, short-range spotting and flanking. Numerous structures threatened. Evacuations, road, area and trail closures in effect. Last report unless significant activity occurs.

Predictive Services Discussion: Westerly flow will develop over most of the northern U.S. while a strong ridge settles over the Southwest and develops over the East. Isolated showers or thunderstorms will linger in the northern Rockies. Scattered showers and thunderstorms will move through the Midwest and form across the Mid-Atlantic states. Temperatures will continue a slow warmup in the West with mild conditions in the Northwest and northern Rockies and hot in the Southwest. Mild temperatures will also drop into the northern Plains while most of the East remains warm. Very hot conditions will continue over the southern Plains. In Alaska, isolated thunderstorms will develop over the southern third of the state. Temperatures will remain very warm.

# Parking Safely on Slopes <br> Vehicles/Roads Category 

In 2005, three fireline fatalities related to improper parking on slopes occurred. One involved a water tender, another a fire engine and the third was a command vehicle. In wildland fire operations, we frequently exit vehicles quickly, but it is imperative that anytime a vehicle is left unattended, time is taken to assure it is parked safely and will not present a hazard to ourselves or others. Standard operating procedures for parking vehicles safely on slopes are:

- Turn the front wheels uphill or into the inside/embankment.
- Firmly set the emergency brake.
- Put the vehicle in park (if automatic transmission) or in forward gear (if manual transmission); do not leave it in neutral.
- Turn off the engine.
- Chock the wheels. When utilizing chocks, make sure they are on the correct side in reference to the slope. Assure the chocks are approved to hold the weight of the vehicle and will grip on the road surface.
- Be especially aware of safe parking on slopes on incidents when moving a vehicle frequently, as in using engines in pumping operations along a roadway -- it is very easy to get complacent with procedures or not even realize that you are on a slightly different slope which would require placing chocks differently. It is the driver's responsibility to assure not only that the vehicle is operated safely, but is positioned and parked safely.
