# National Interagency Coordination Center Incident Management Situation Report <br> Sunday, July 17, 2016 - 0530 MT <br> National Preparedness Level 2 

## National Fire Activity

Initial attack activity:
New large incidents:
Large fires contained:
Uncontained large fires:**
Light (182 new fires)

Area Command Teams Committed:
NIMOs committed:
Type 1 IMTs committed:
Type 2 IMTs committed: 4
**Uncontained large fires include only fires being managed under a full suppression strategy.
Link to Geographic Area daily reports.

## Rocky Mountain (PL 3)

## New fires:

New large incidents:
Uncontained large fires:
Type 2 IMTs Committed:

* Lava Mountain, Shoshone NF. IMT 2 (Connell). Twenty miles northwest of Dubois, WY. Timber and heavy logging slash. Extreme fire behavior with uphill runs and long-range spotting. Numerous structures threatened.

Hayden Pass, Pike \& San Isabel NF. IMT 2 (Esperance). Twenty miles southeast of Salida, CO. Timber, heavy logging slash and chaparral. Active fire behavior with group torching, smoldering and backing. Numerous structures threatened. Evacuations, road, area and trail closures in effect.

* Indian Canyon, South Dakota Wildland Fire Suppression, DOF. Six miles southeast of Edgemont, SD. Timber and short grass. Active fire behavior with running, torching and short-range spotting. Structures threatened. Evacuations and road closures in effect.

Blair, White River Field Office, BLM. Thirty miles west of Meeker, CO. Brush and short grass. Minimal fire behavior with isolated torching.

Hairy, Fort Carson Army Base. Twenty-one miles southwest of Colorado Springs, CO. Hardwood slash, brush and tall grass. Minimal fire behavior. Area closures in effect. Last report unless significant activity occurs.

## Alaska Area (PL 2)

New fires:
New large incidents:
Uncontained large fires:
Type 2 IMTs committed:34511

Tok River, Tok Area Forestry, DOF. IMT 2 (Kurth). Seven miles south of Tok, AK. Timber, light logging slash and grass. Moderate fire behavior with single tree torching and creeping. Structures threatened.

Alatna Complex (2 fires), Tanana Zone, BLM. Ten miles west of Alatna, AK. Timber, brush and short grass. Active fire behavior with crowning, wind-driven runs and spotting. Structures threatened. Last report unless significant activity occurs.

Dulbi Flats, Galena Zone, BLM. Previously reported incident. Started on FWS land 18 miles northeast of Huslia, AK. Timber. Active fire behavior with torching and backing. Last report unless significant activity occurs.

* Camp Creek, Galena Zone, BLM. Started on state land 58 miles southeast of Galena, AK. Timber, brush and hardwood slash. Active fire behavior with backing. Last report unless significant activity occurs.
* Galatea Creek, Galena Zone, BLM. Started on state land 52 miles southeast of Galena, AK. Timber, brush and hardwood slash. Extreme fire behavior with running, torching and backing. Last report unless significant activity occurs.

[^0]* Crater Mountain, Southwest Area Forestry, DOF. Thirty-two miles west of McGrath, AK. Timber. Active fire behavior. Last report unless significant activity occurs.
* Little Underhill Creek, Southwest Area Forestry, DOF. Twenty-five miles east of Line Village, AK. Timber. Moderate fire behavior. Last report unless significant activity occurs.

Predictive Services Discussion: An upper trough will deepen along the West Coast while a ridge amplifies in the central U.S. Strong southwesterly to southerly winds will form over the Great Basin and the central Rockies. Widely scattered thunderstorms will develop over the Southwest as moisture moves northward out of Mexico. Scattered showers and thunderstorms will move into the Northwest and northern Rockies ahead of the West Coast trough. Thunderstorms will move across the northern Plains to the Upper Midwest. Scattered showers and thunderstorms will continue along the eastern seaboard and in the Gulf states. Temperatures will remain hot across the southern third of the nation, with hot weather spreading northward into the Plains. Mild conditions will continue along the northern tier of states. In Alaska, rain and showers will increase from the north as a cold front pushes through the state. Temperatures will cool statewide, but the Interior will remain warm.

This Day in History is a brief summary of a powerful learning opportunity and is not intended to second guess or be judgmental of decisions and actions. Put yourself in the following situation as if you do not know what the outcome will be. What are the conditions? What are you thinking? What are YOU doing?

Battlement Creek Fire, Colorado - July 17 ${ }^{\text {th }}, 1976$

Incident Summary: It's 1976 and western Colorado is experiencing an unusually severe fire season caused partly by unusual fuel conditions and heavy lightning activity during dry weather. A severe frost in June kills a high percentage of the leaves on Gambel oak which remain on the branches and is considered one of Colorado's most flammable fuels. 10 hour fuels are at $3-5 \%$. A large scale high pressure weather pattern sits over western Colorado allowing for local weather to be influenced by terrain and diurnal winds averaging $10-15 \mathrm{mph}$ in the afternoon with higher gusts. The weather is fair and hot with the temperatures at Grand Junction and Rifle reaching into the mid and upper 90's. A fire is reported 40 miles northeast of Grand Junction, in the Battlement Creek drainage. The fire is burning over an elevation range of 6200-8400 ft on a steep west-facing slope.

Friday July 16, 0630, two hotshot crews from the Coconino NF Arizona arrive at the Battlement Creek fire. This is the seventeenth fire of the first season for the newly formed Mormon Lake Hotshot Crew. The strategy is to prevent western and southern spread. The crews begin a major burnout of the catline (dozer line) from the rocky bluffs (Point $A$ ) at about 1615 , downhill along the catline toward the Battlement Creek road at the bottom (Point C) ending about 2030. The fire makes an uphill run in oak brush burning out a large portion of the drainage (from the road east to the ridgetop) in about 20 minutes. Two "impressive" fire whirls are observed between 1600-1700. The night shift continues the burn out (Point C-D and beyond along the road) but is spotty with considerable unburned fuel remaining. Other night shift crews construct line along the ridgetop (Point E to G). Based on Friday's fire behavior, the E-G line is a crucial spot on the fire. Saturday July $17^{\text {th }}, 0700$, at morning briefing the Mormon Lake crew is assigned to burn out this section of line.

Saturday morning, July $17^{\text {th }}$ - Due to a delay with the helicopter, the Mormon Lake crew does not get to the base of the rock bluff (Point E) until 1100. They are instructed to improve and burn out the line from the rocky bluff to the helispot (Point E-G). The burnout squad consisted of the crew boss, squad boss and 2 crewmembers. The rest of the crew is improving the handline down the ridgetop.

At this same time another crew is burning out in the bottom of the draw (Point C-D). The draw burns readily, uphill toward the ridge and the Mormon Lake crew. Neither crew knew of the specific location or assignment of the other.
1400-1/3 the way from the rock bluff to the upper helispot, there is a noticeable increase in smoke from the draw below (where the other crew had been burning). The crew boss is instructed to speed up the line improvement squad on toward the safety zone (Point G) and to narrow down and speed up his burnout on down the ridgeline to join the remainder of the crew in the safety zone when his burnout was done. Upslope winds have increased to $25-35 \mathrm{mph}$.
1425-1440 - The line improvement squad just makes it into the safety zone when the flame front hits the ridge. 200 yards back, the burnout squad radios that they are "trapped". Their escape is blocked by heavy smoke and flames.
1440-1445 - The squad removes their canvas vests to cover their head and face, moistened the vests and their clothes with water from their canteens, and lays face down in the mineral soil of the fireline.
1448 - All four firefighters are very badly burned. Three will lose their lives.

## Discussion Points

The day prior to the burnover, an airtanker crashed during a retardant dropping mission on the Battlement Creek fire killing the pilot.

$\checkmark$ Discuss how incidents and distractions can affect our judgment and situational awareness.
The crew all wore aluminum hardhats, canvas vests, Nomex shirts and non-fire-resistant work pants. Fire shelters were not used. Fire shelters may have prevented serious burns and death at this incident. Policy on issuing and carrying shelters had not been established yet. This incident became the catalyst for the mandatory use of fire shelters and fire resistant clothing.
$\checkmark$ Take this opportunity to inspect, repair or replace your PPE and fire shelter if needed to ensure that it protects you as well as possible.

[^0]:    * Yuki River, Galena Zone, BLM. Started on state land 40 miles east of Kaltag, AK. Timber. Minimal fire behavior. Precipitation occurred over the fire area yesterday. Last report unless significant activity occurs.
