Rocky Mountain (PL 3)

New fires:	32
New large incidents:	3
Uncontained large fires:	2
Type 2 IMTs Committed:	2

Lava Mountain, Shoshone NF. IMT 2 (Connell). Twenty miles northwest of Dubois, WY. Timber and heavy logging slash. Moderate fire behavior with single tree torching, short-range spotting and creeping. Numerous structures threatened.

Hayden Pass, Pike & San Isabel NF. IMT 2 (Esperance). Twenty miles southeast of Salida, CO. Timber, heavy logging slash and chaparral. Minimal fire behavior with single tree torching, creeping and smoldering. Numerous structures threatened. Evacuations, road, area and trail closures in effect.

Indian Canyon, South Dakota Wildland Fire Suppression, DOF. Six miles southeast of Edgemont, SD. Timber and short grass. Minimal fire behavior. Numerous structures threatened. Evacuations and road closures have been lifted.

Beaver Creek, Routt NF. Twenty-four miles northwest of Walden, CO. Timber and brush. Moderate fire behavior with group tree torching, flanking and smoldering. Numerous structures threatened. Evacuations, road, area and trail closures in effect. Last report unless significant activity occurs.

Rock, Nebraska NF. Fifteen miles southeast of Ardmore, NE. Tall grass. Minimal fire behavior.

Predictive Services Discussion: Deep troughs on both coasts and a strong ridge in the central U.S. will drive the weather across the country. Strong southwesterly flow will keep windy conditions across the Interior West. Scattered showers and thunderstorms will repeat over the Southwest and eastern Great Basin and spread into the central Rockies. Showers and a few thunderstorms will develop over the Northwest and northern Rockies. A cold front moving through the East will produce showers and thunderstorms from the central Plains to New England. Widely scattered thunderstorms will develop in the afternoon across the Southeast. Hot weather will continue in the southern third of the country, with extreme heat spreading north to the High Plains of Montana and the Dakotas. Mild weather will move into the Upper Midwest, the Great Lakes and New England. Mild conditions will also continue in the Northwest and the northern Rockies. In Alaska, scattered showers and a few thunderstorms will continue. Temperatures will remain seasonal.

http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm

UNFAMILIAR WITH WEATHER AND LOCAL FACTORS INFLUENCING FIRE BEHAVIOR

Weather / Fire Behavior Category

- Ask questions of local experts! What kinds of questions would you ask?
- Does the operational period plan give you adequate weather and information? What kinds of weather forecasts can you get? What other weather or local information do you look for in the shift plan?
- Can you get information from resources that have been on the fire? What questions will you ask of the crew that you are replacing?
- Is there any other way to obtain information? List common sources of information on weather and local factors (Examples: Web based weather Activity Planner, Point Forecast Matrix, NOAA Internet Briefing)
- To reduce risks:
 - Base all actions on current and expected fire behavior.
 - Post lookouts.
 - Establish escape routes and safety zones.
 - Take extra caution! Discuss a fire where you relied on information from the local unit (perhaps where your fire knowledge and experience was very different from how they did things—southeast or Alaska).
 - Recognize and report visual indicators (clouds, WX obs., cold front passage, inversion breaking
